

Session 04

Youth Create: Creating 3D Worlds (04)

Lailei Huang, Technology Programs Officer

Lailei.Huang@canadabay.nsw.gov.au

The Learning Space

Agenda

Practise Blender Skills

- Review hard surface modelling basic skills
- Create another furniture - ceiling fan

Project - New Topics

- 3D animation basic skills
- Animate the ceiling fan

Learn to animate a 3D Object

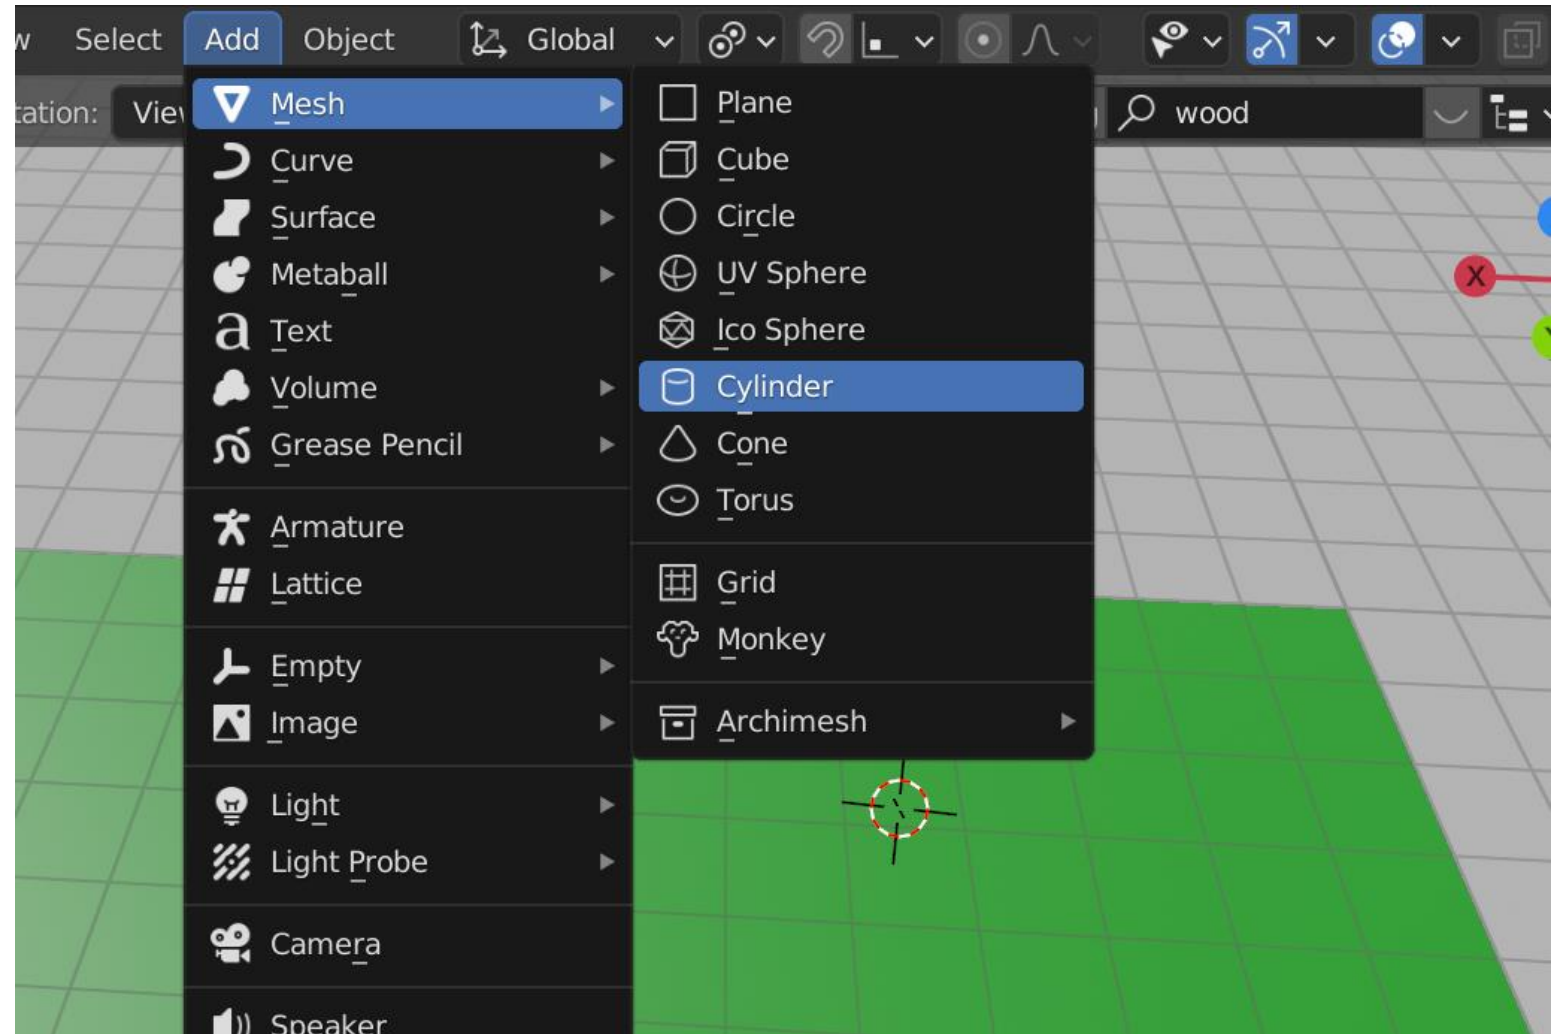

Step 01:

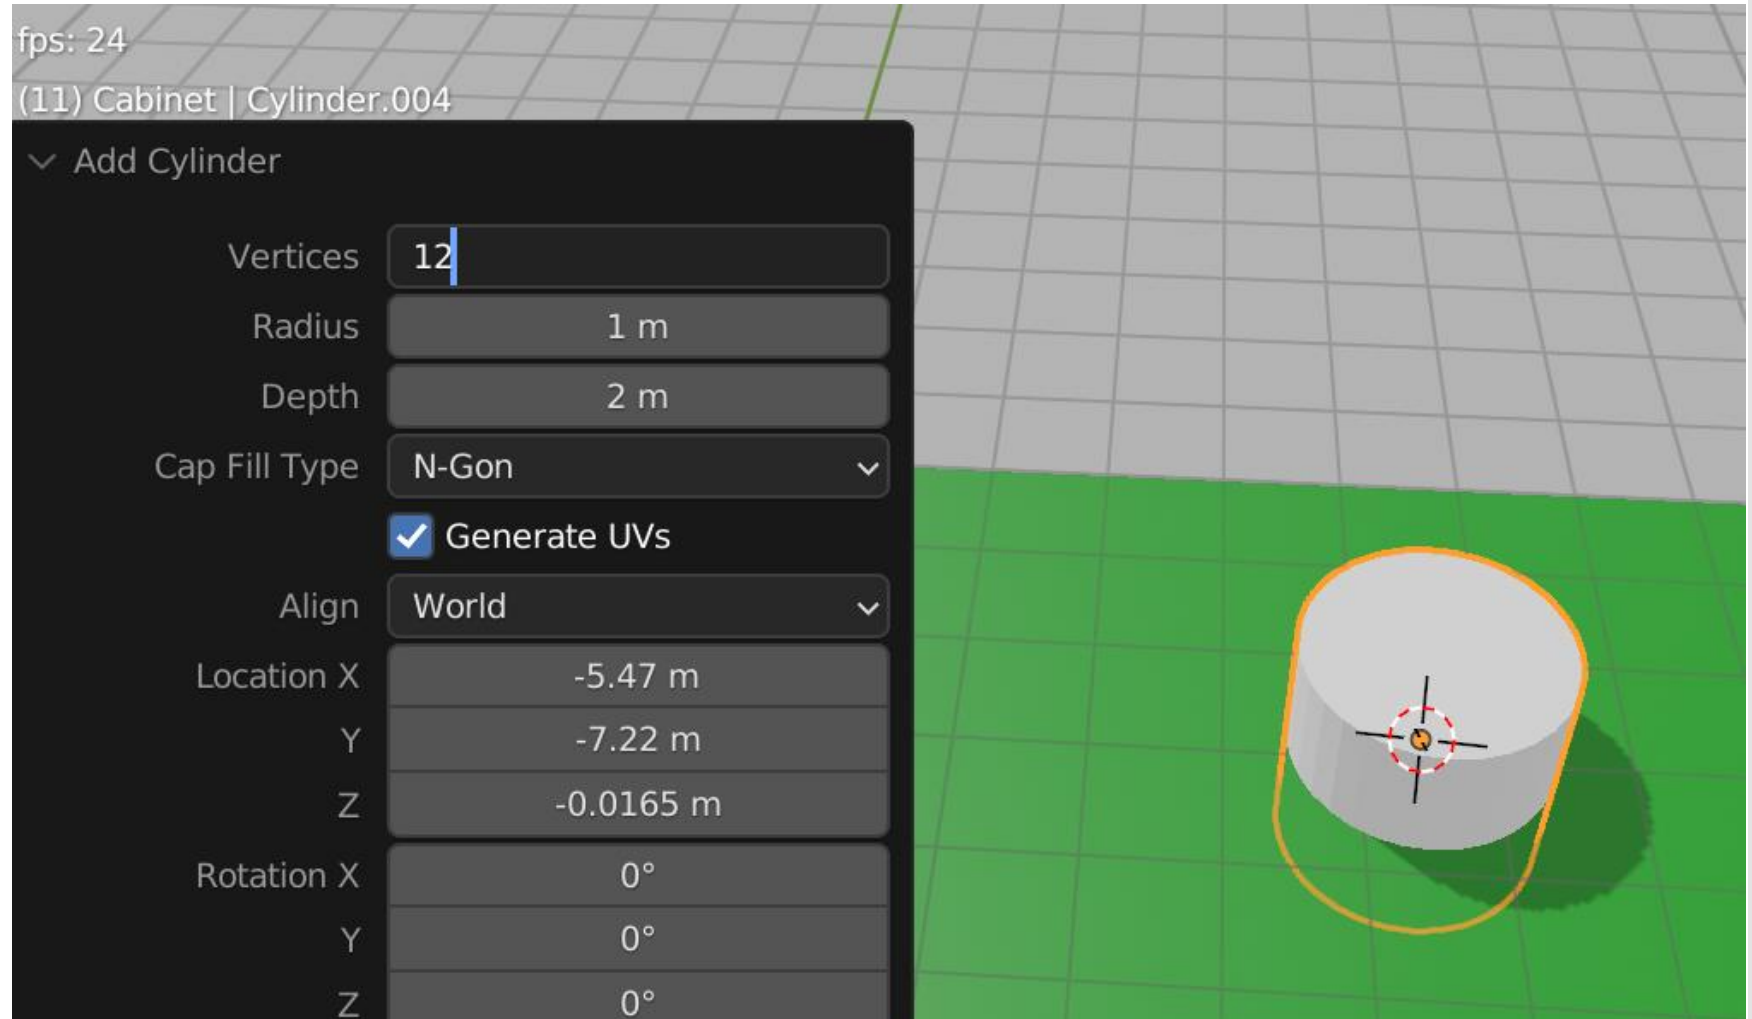

3D Model a Ceiling Fan

Let's start with
a Cylinder

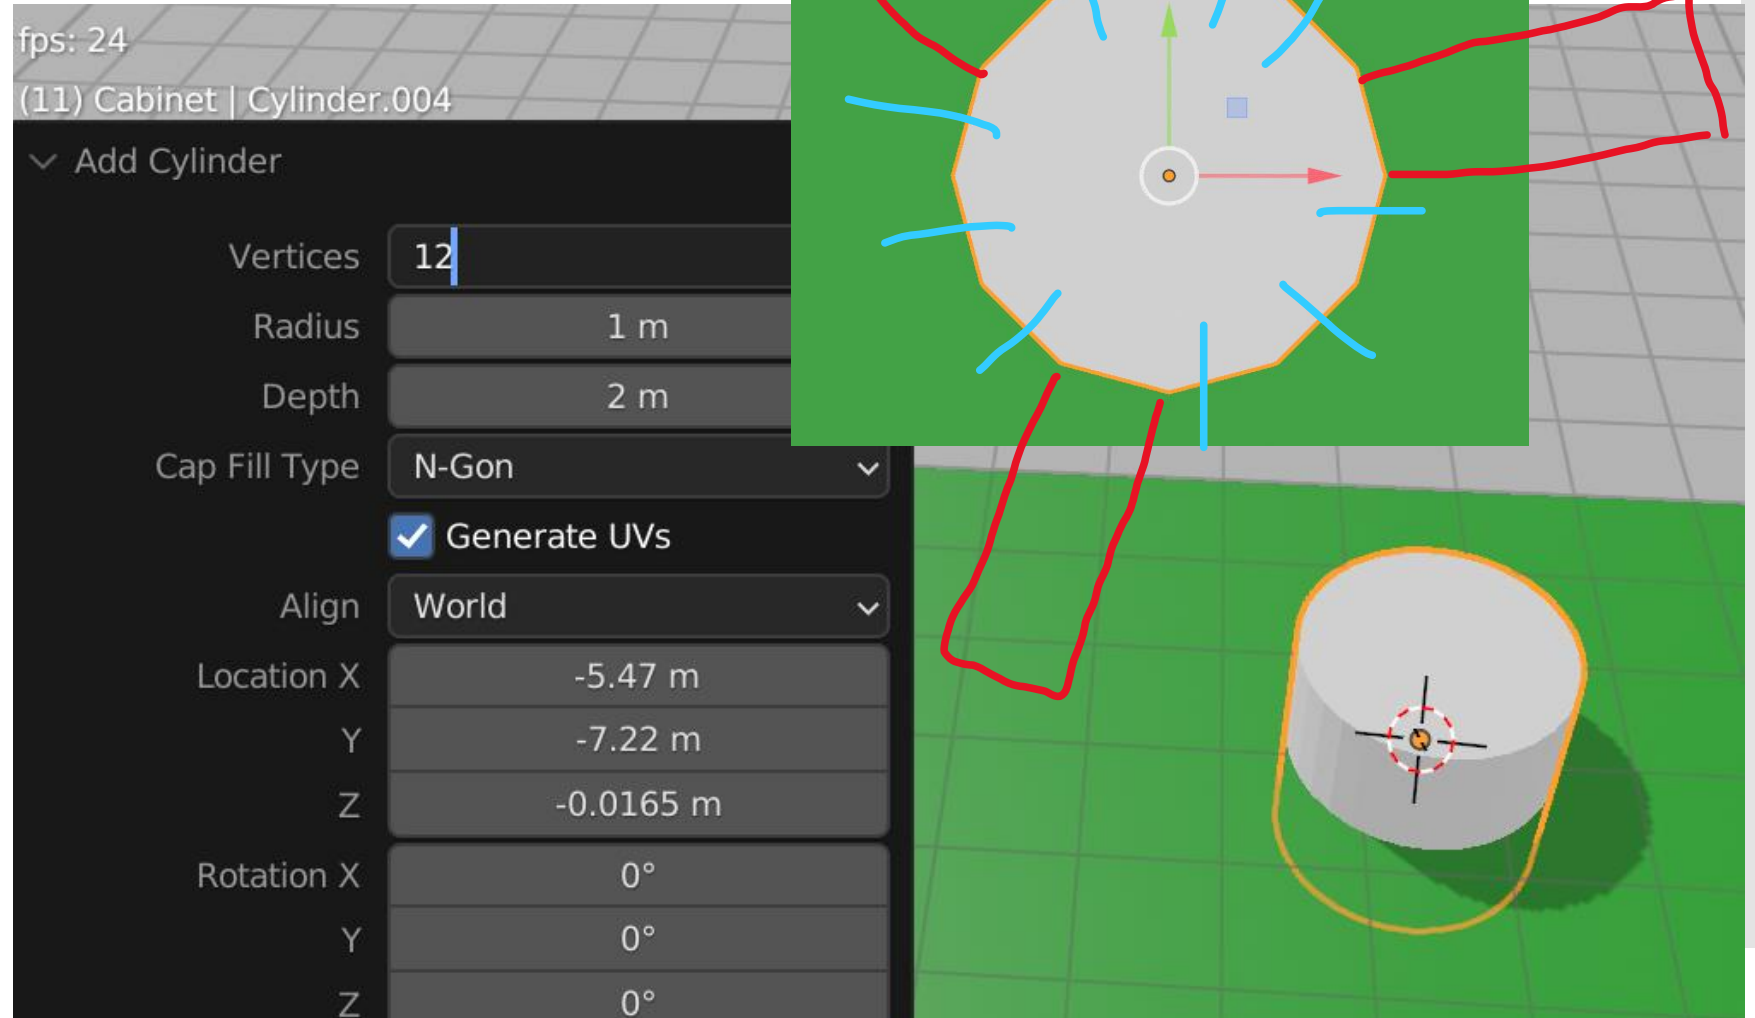

Shortcut:
Shift + 'A'

Reduce Vertices to 12

Reduce Vertices to 12 - Why?

Make the
Cylinder into a
fan base

Shortcut:

'G' + 'Z' to move

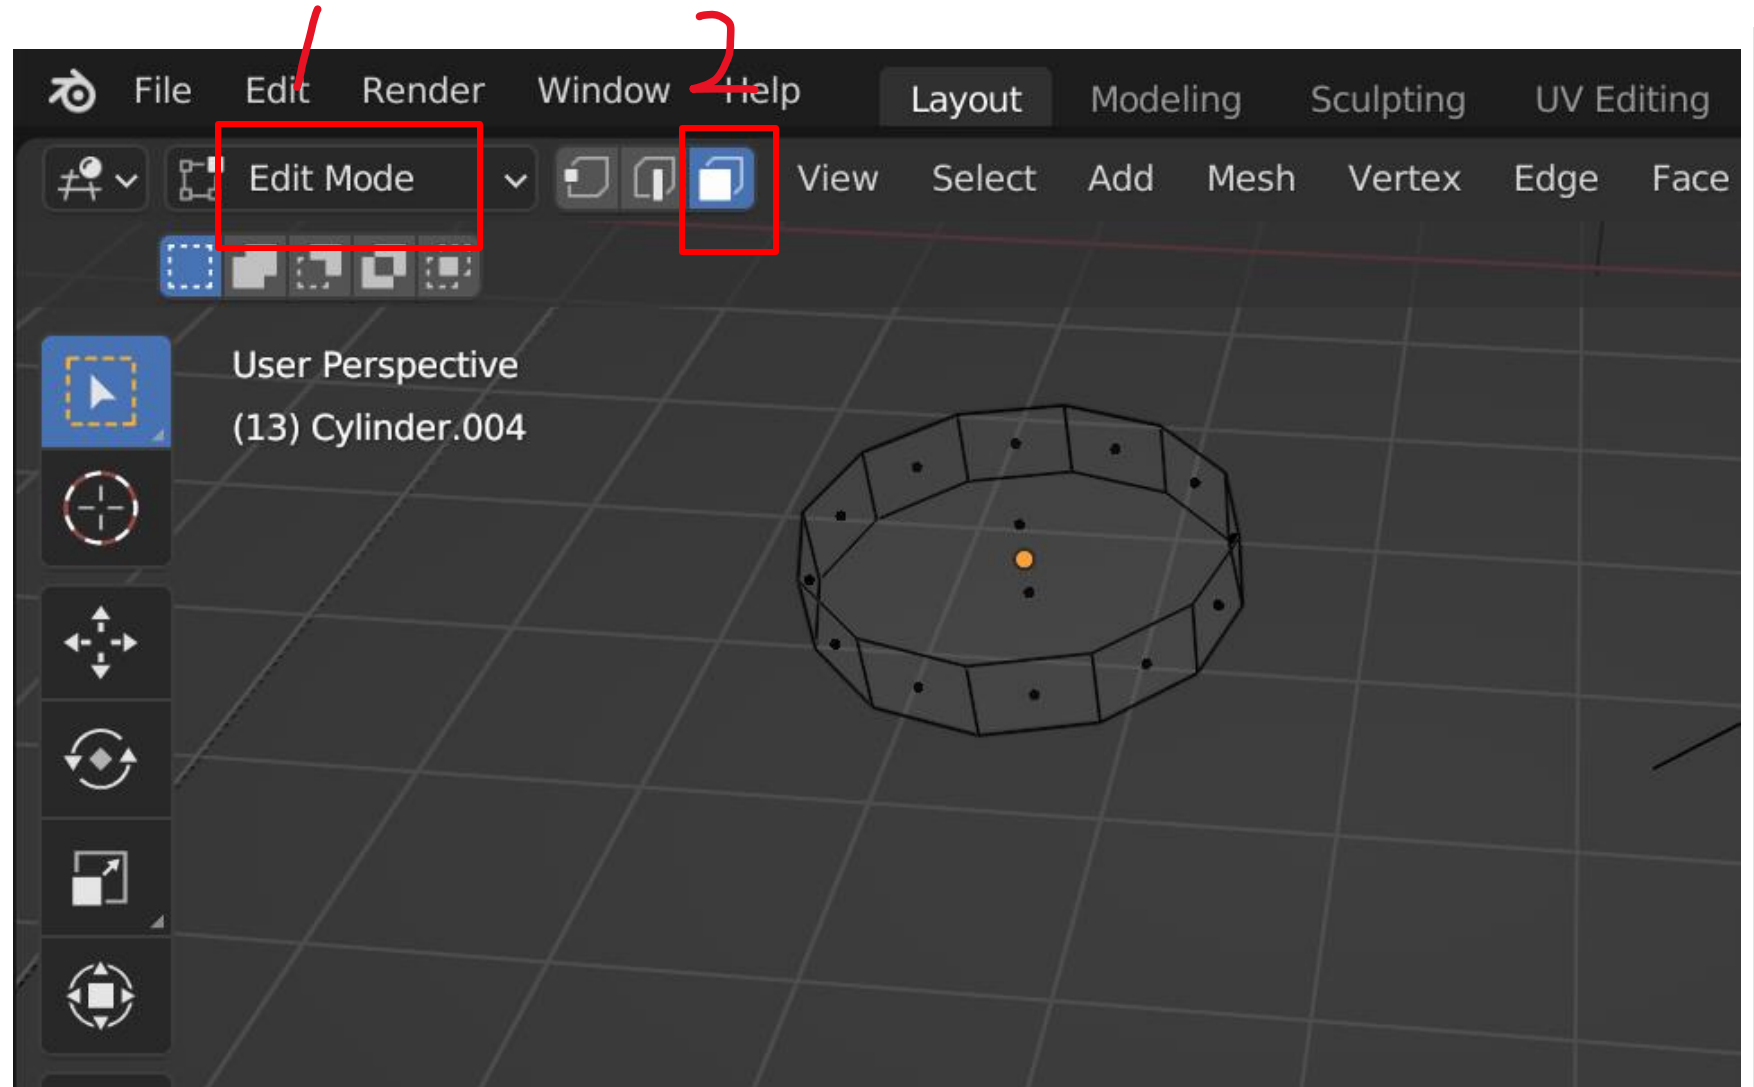

'S' + 'Z' to scale

Review

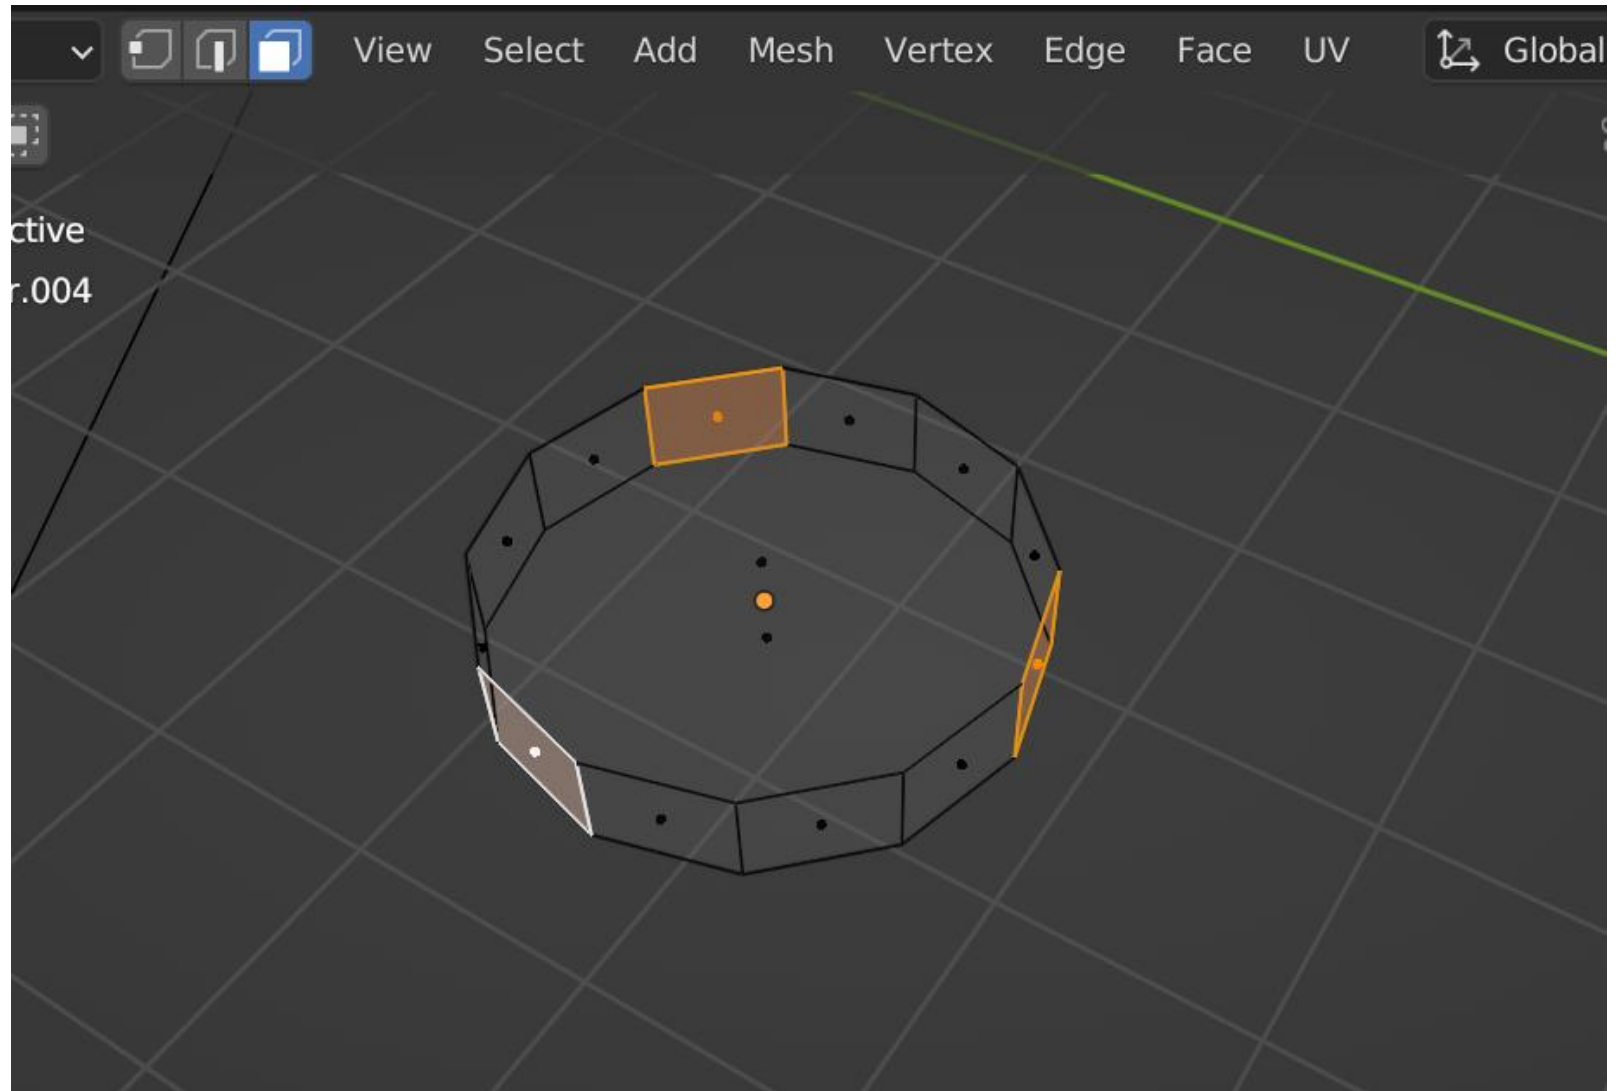

Switch to **Edit Mode** & then choose **Face**

Shortcut:
'Tab' key

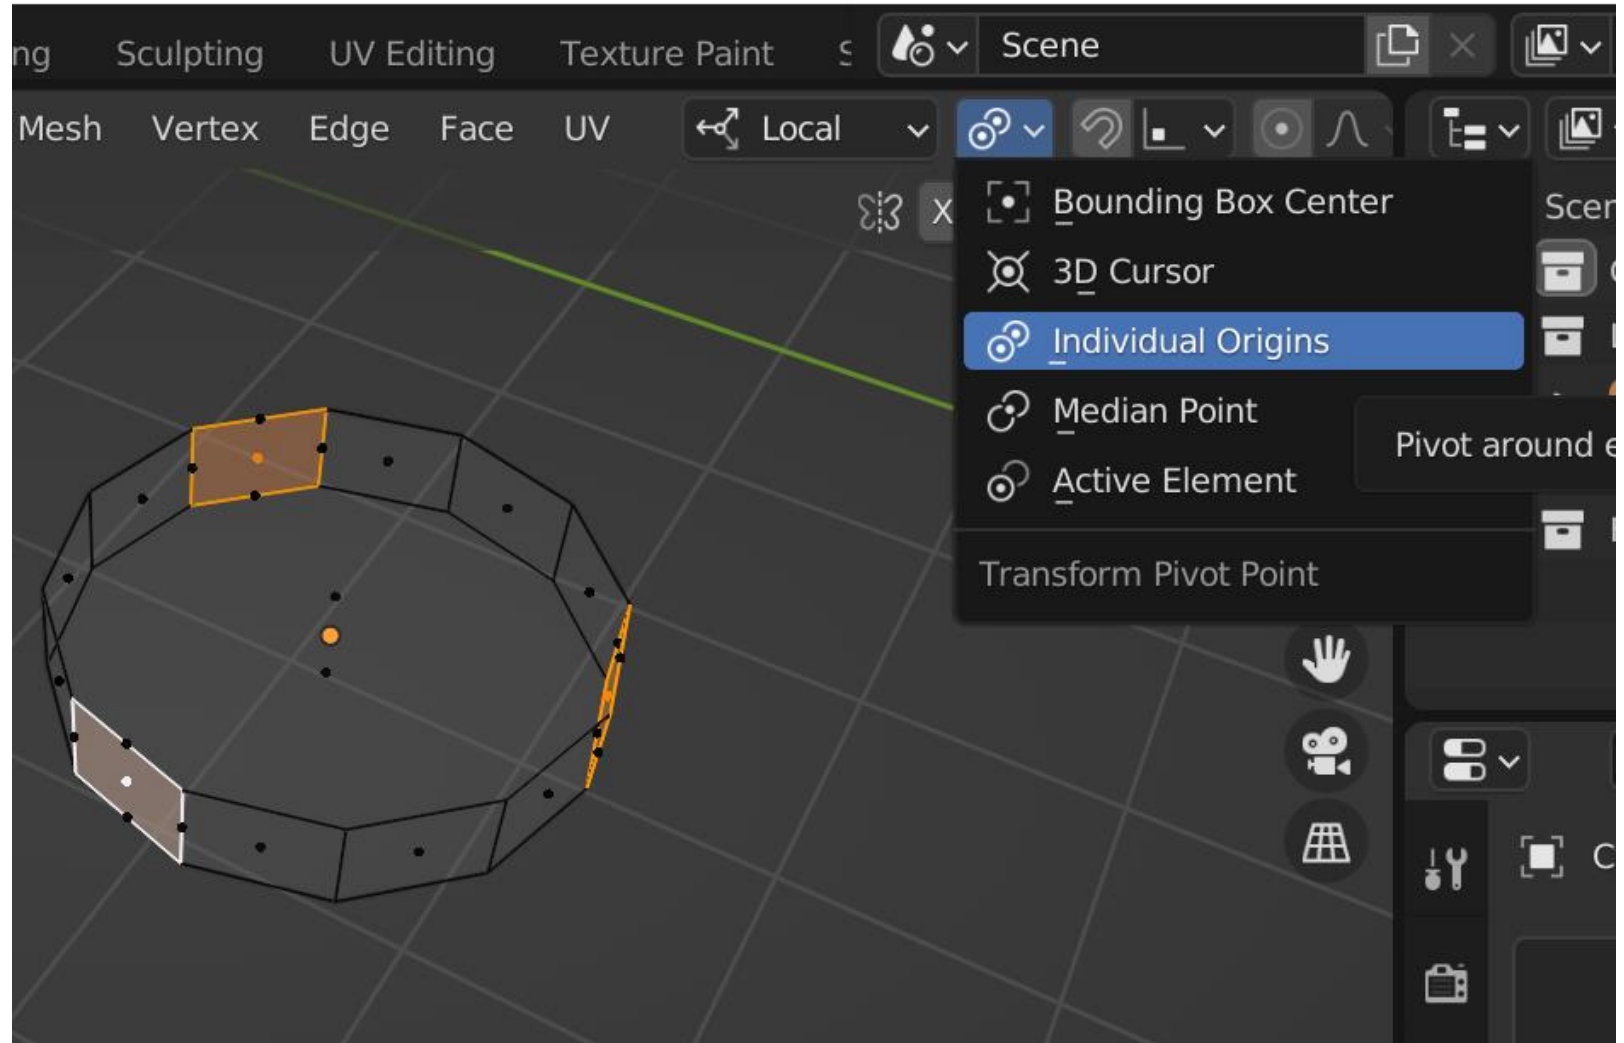

Now let's
select
& extrude the
three faces

Multi-select by
holding 'shift'
key

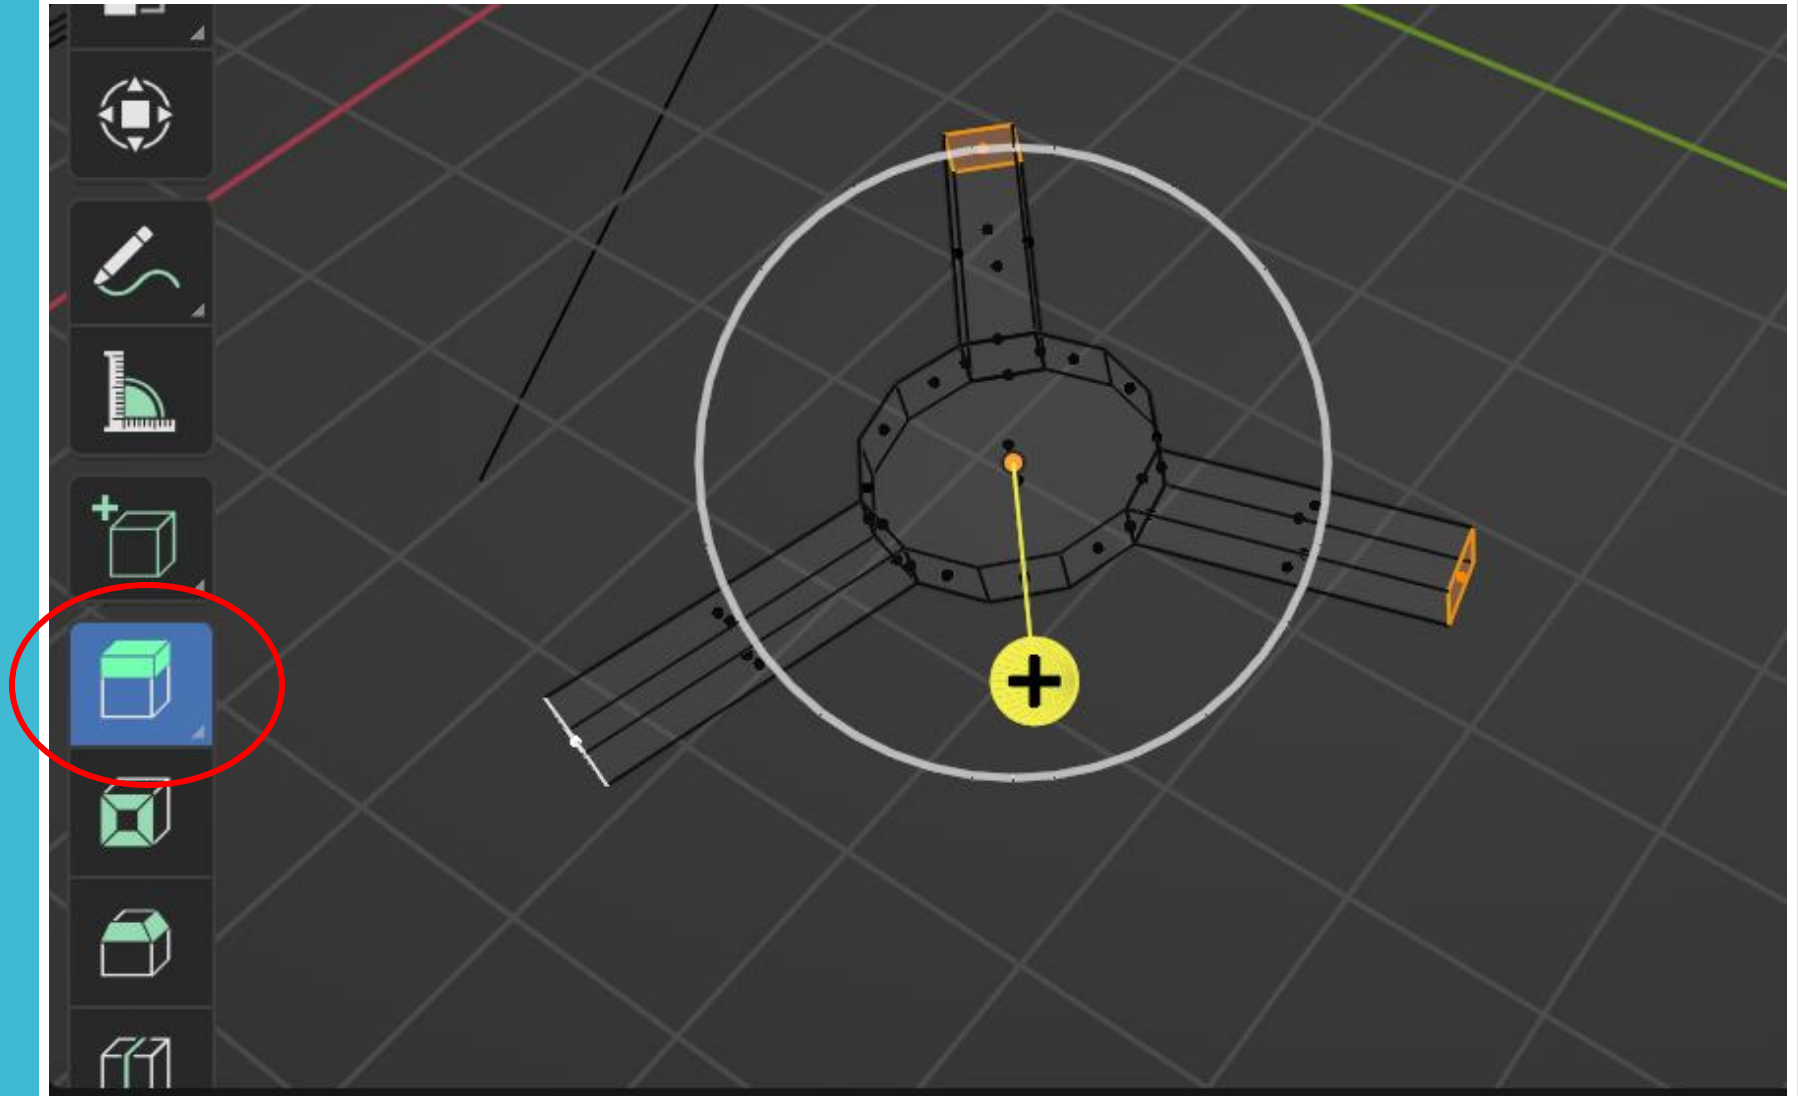

Set the
'Transform
Pivot Point' for
each face

Choose
'Individual
Origins'

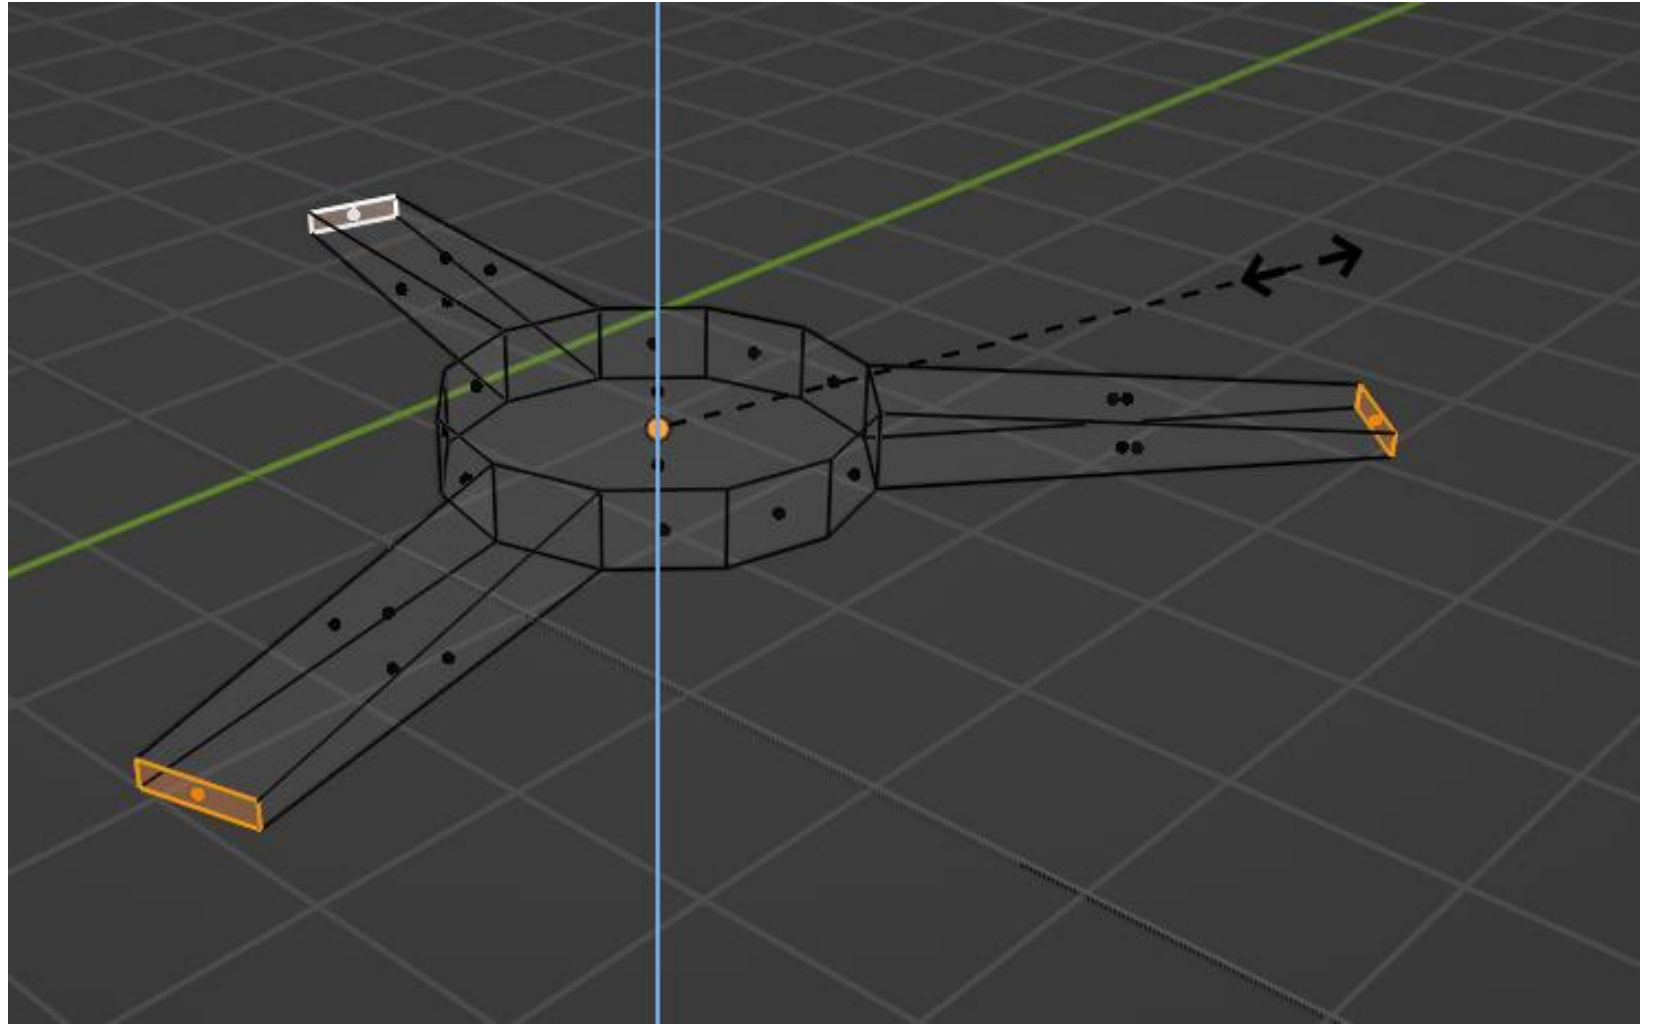

Extrude the
faces

Shortcut:
'e' key

Adjust the fans
tip, e.g., squeeze
them along 'z' axis

Shortcut:
's' then 'z' key

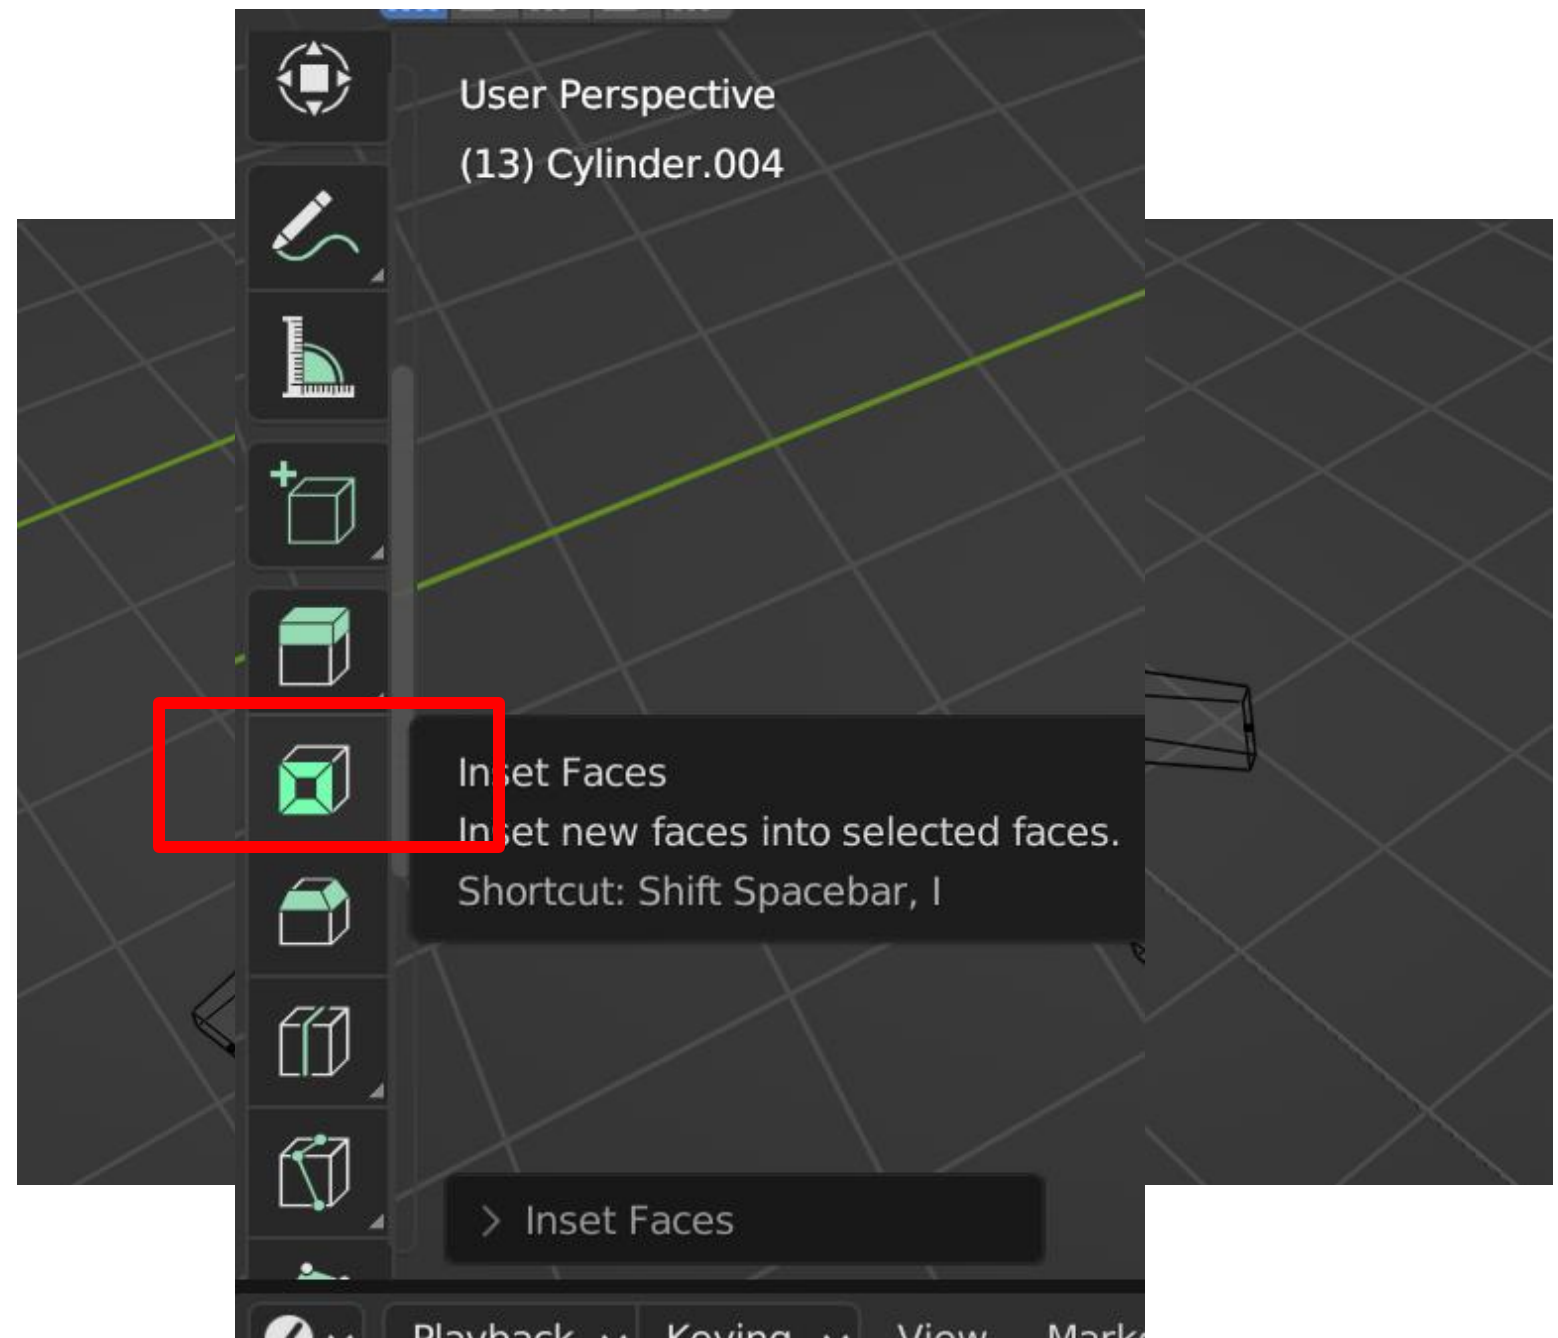

It's not just a
cylinder ... let's
adjust the fan
base further

Let's see
another Basic
3D modelling
operator:
=> Insert

Shortcut:
'i' key

Let's see
another Basic
3D modelling
operator:
=> **Insert**

Shortcut:
'i' key

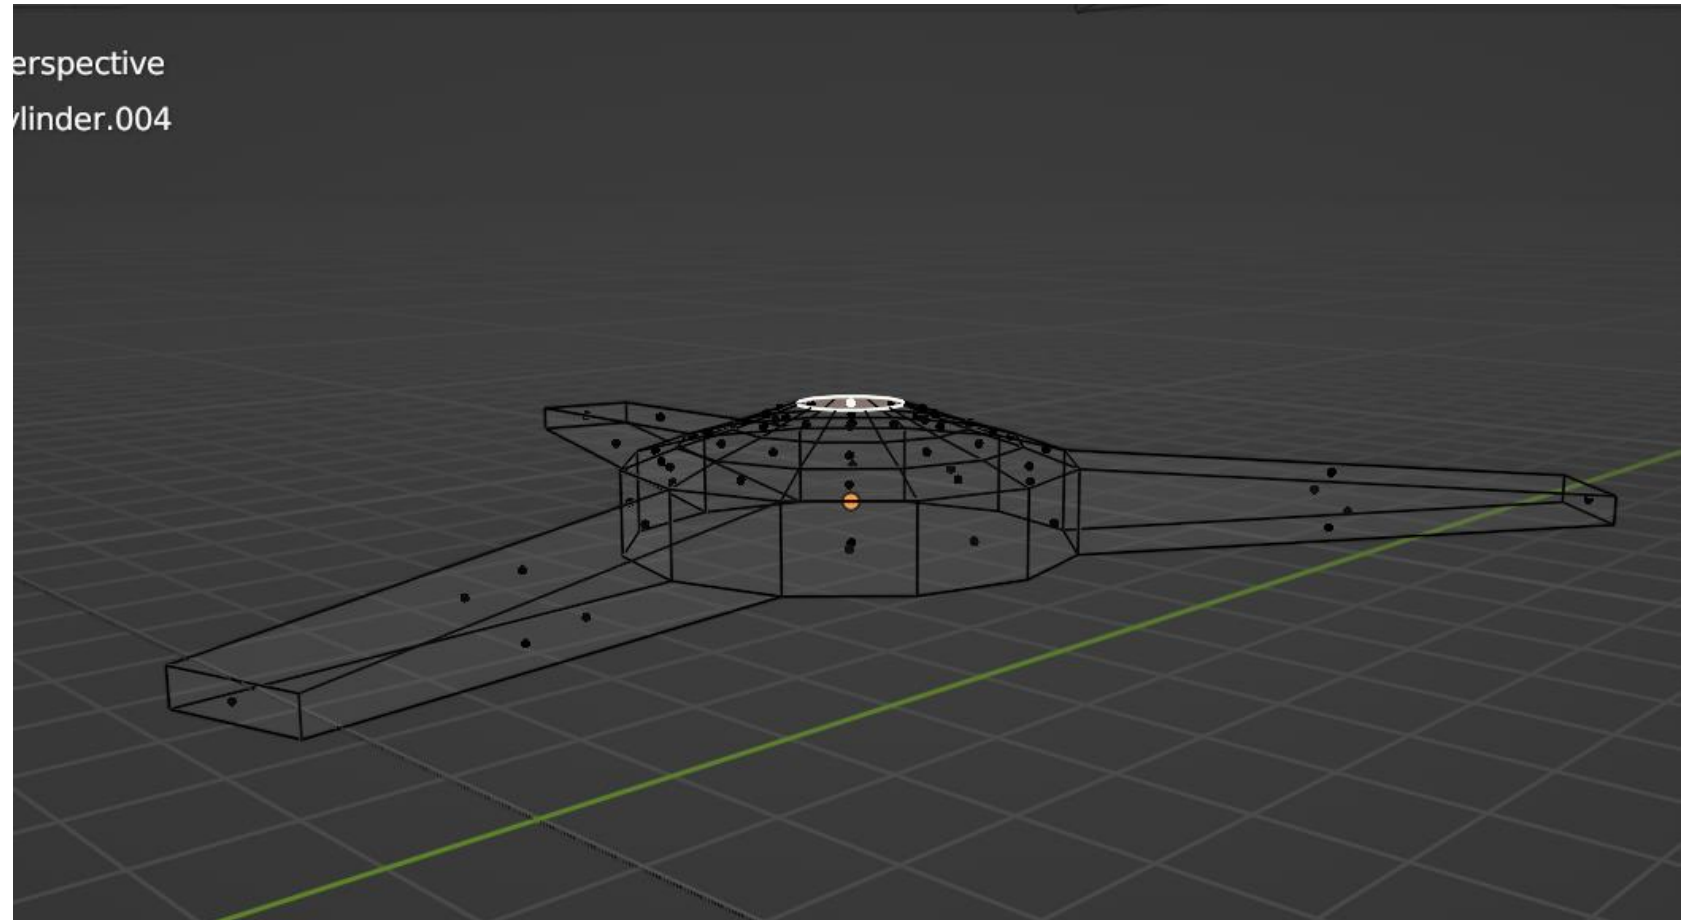

Now move this
face up a bit

Shortcut:
'g' then 'z' key
move up

Let's repeat
these two
steps to
reshape the
base

Insert => Move
up => Insert =>
Move up ...

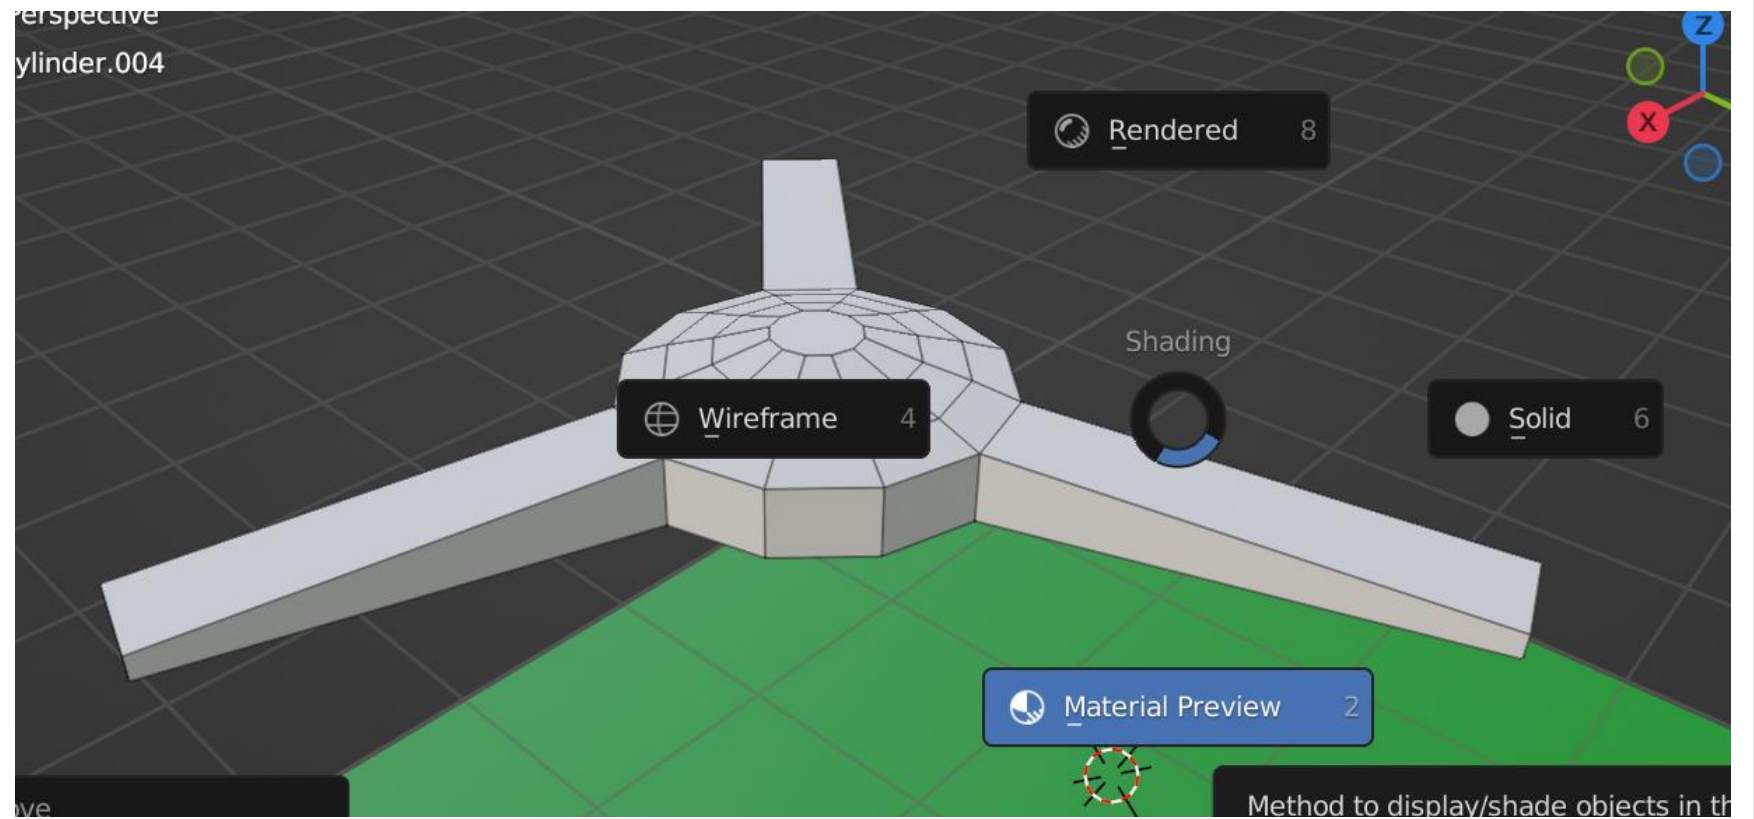

You can do the
same for the
bottom face

Review exercise

Now let's add
some
materials to
the fan

Exercise

Can you make
2 different
materials for
the base and
blades?

Step 02:

Key-frame animation in Blender

Now let's
animate it

.....

Wait, how
about the
extension rod?

Example 01

How it works
- put keys on
an object's
positions

Example 02

Put keys on an object's rotation (e.g., degree)

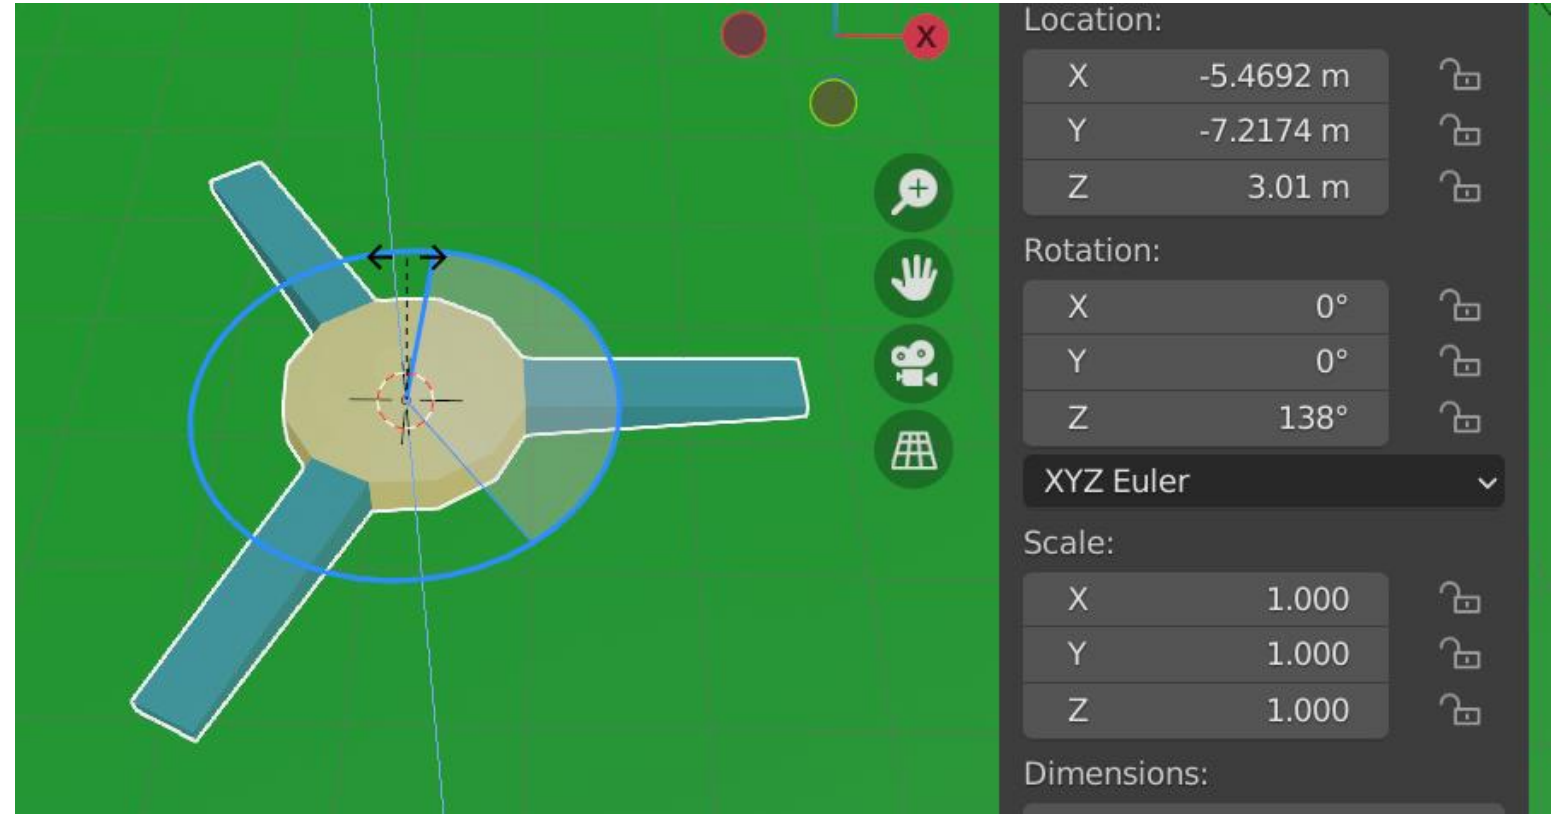

Let's animate
the whole
object => back
to Object
Mode

Shortcut:
'tab' key

Step 01

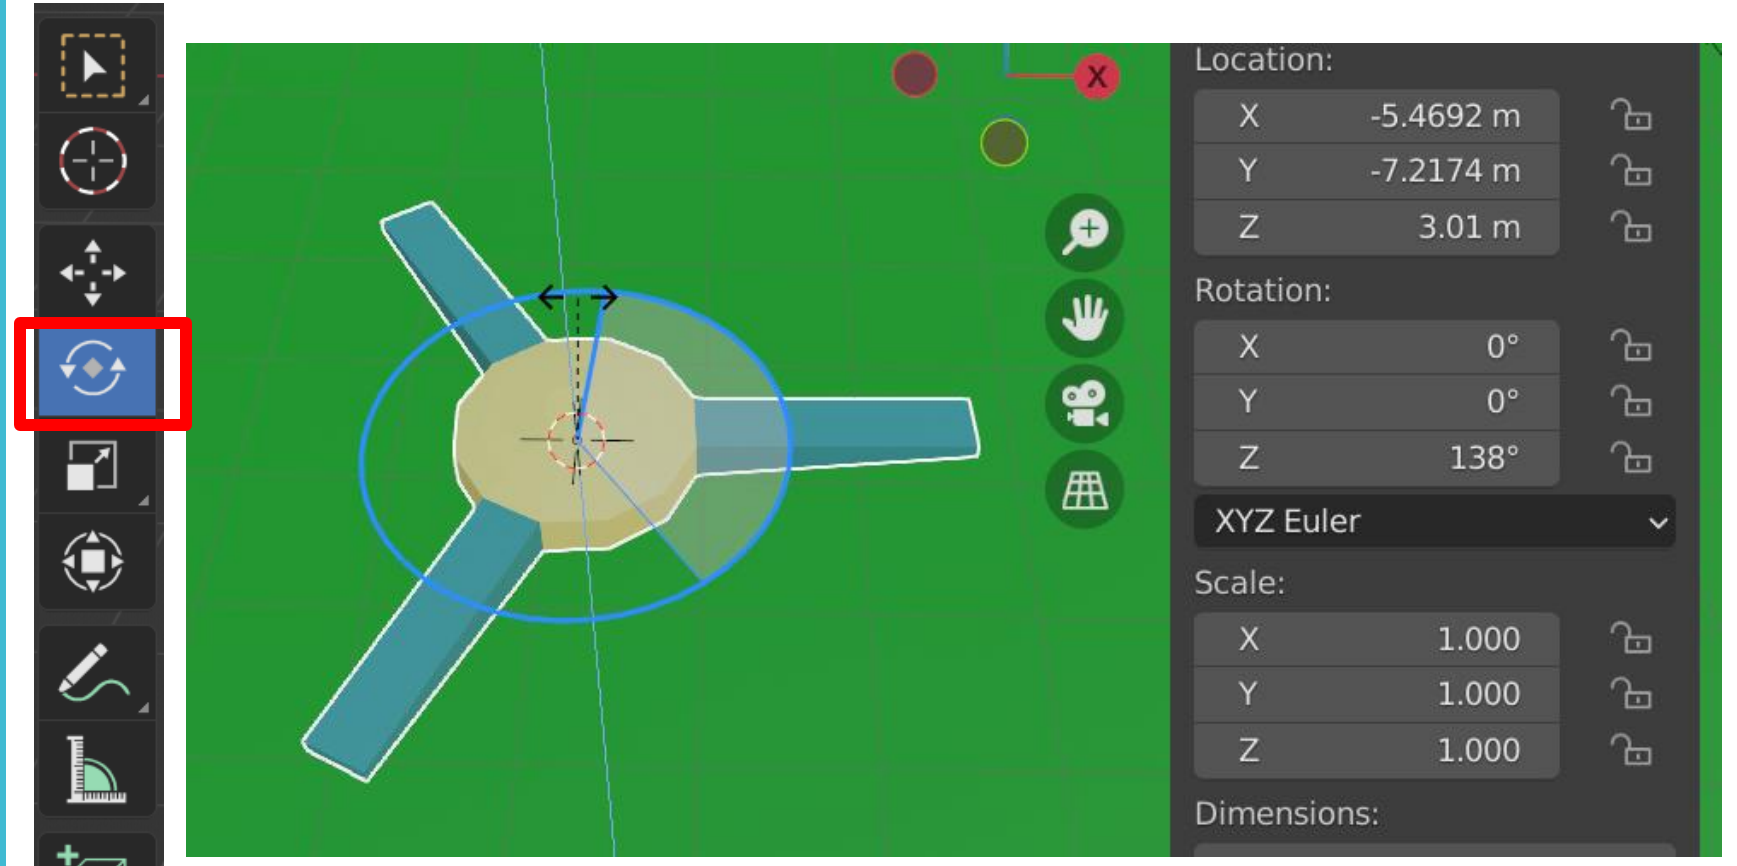

Review: how to manually rotation it along 'Z' axis?

Step 01

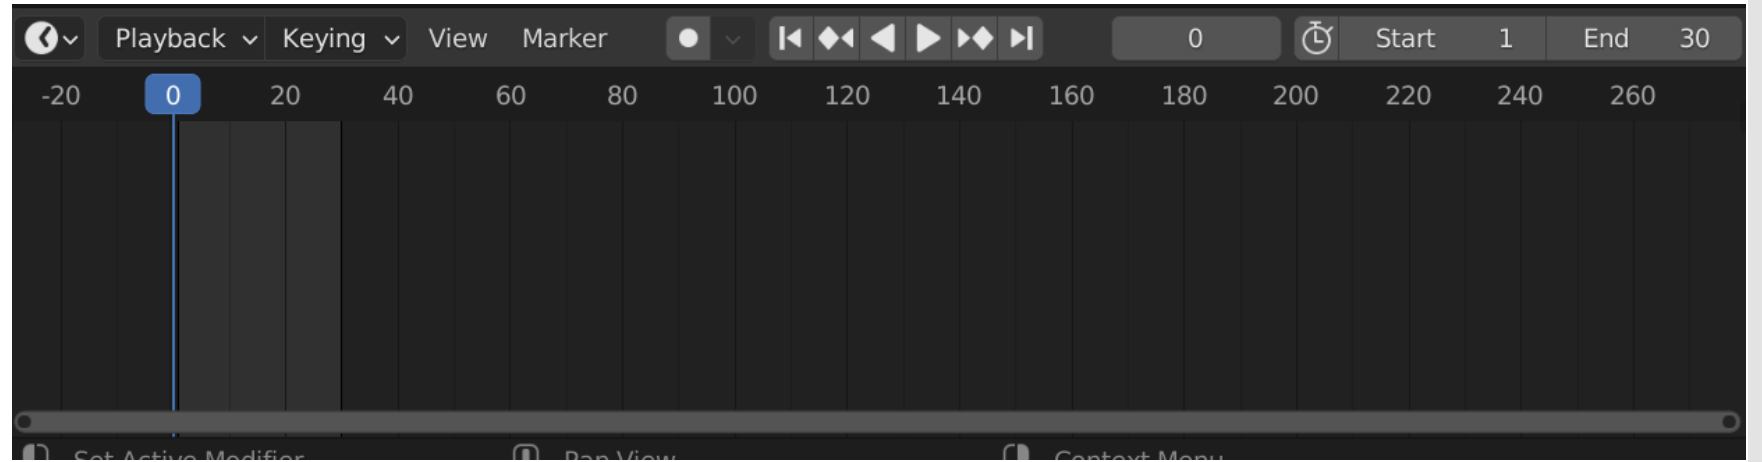

How to manually rotation it along 'Z' axis?

Shortcut:
'r' then 'z' key

Step 02

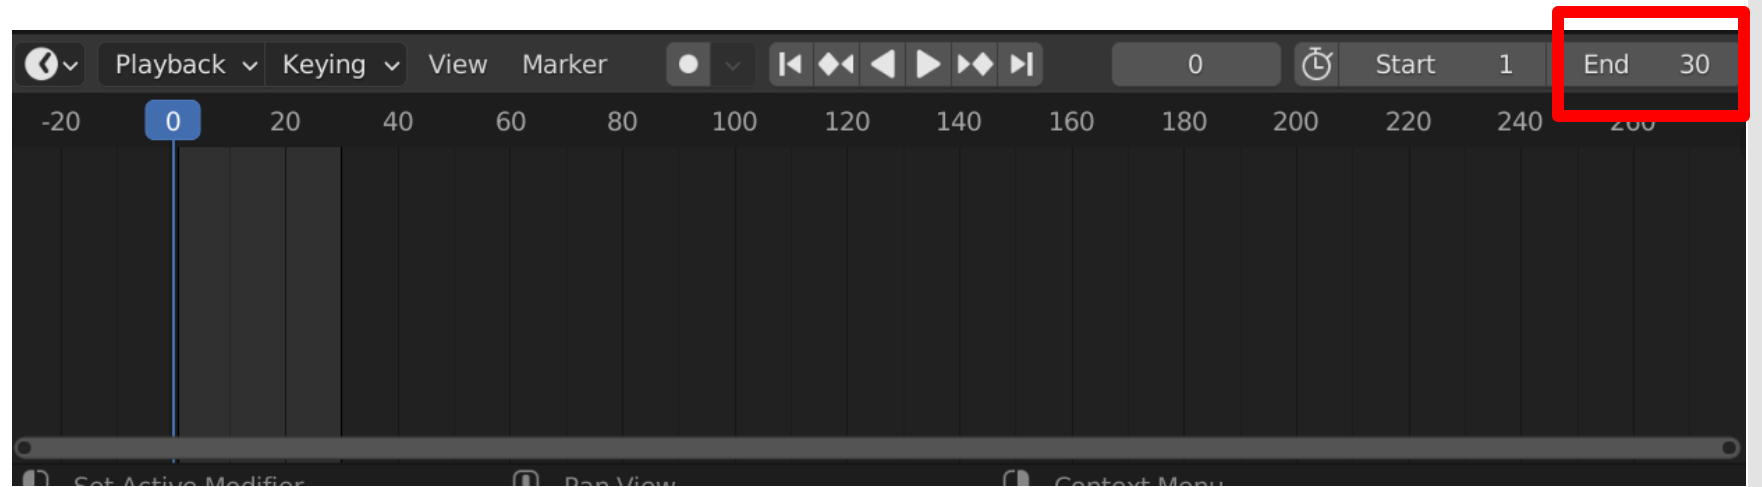

Work with the timeline

Step 02

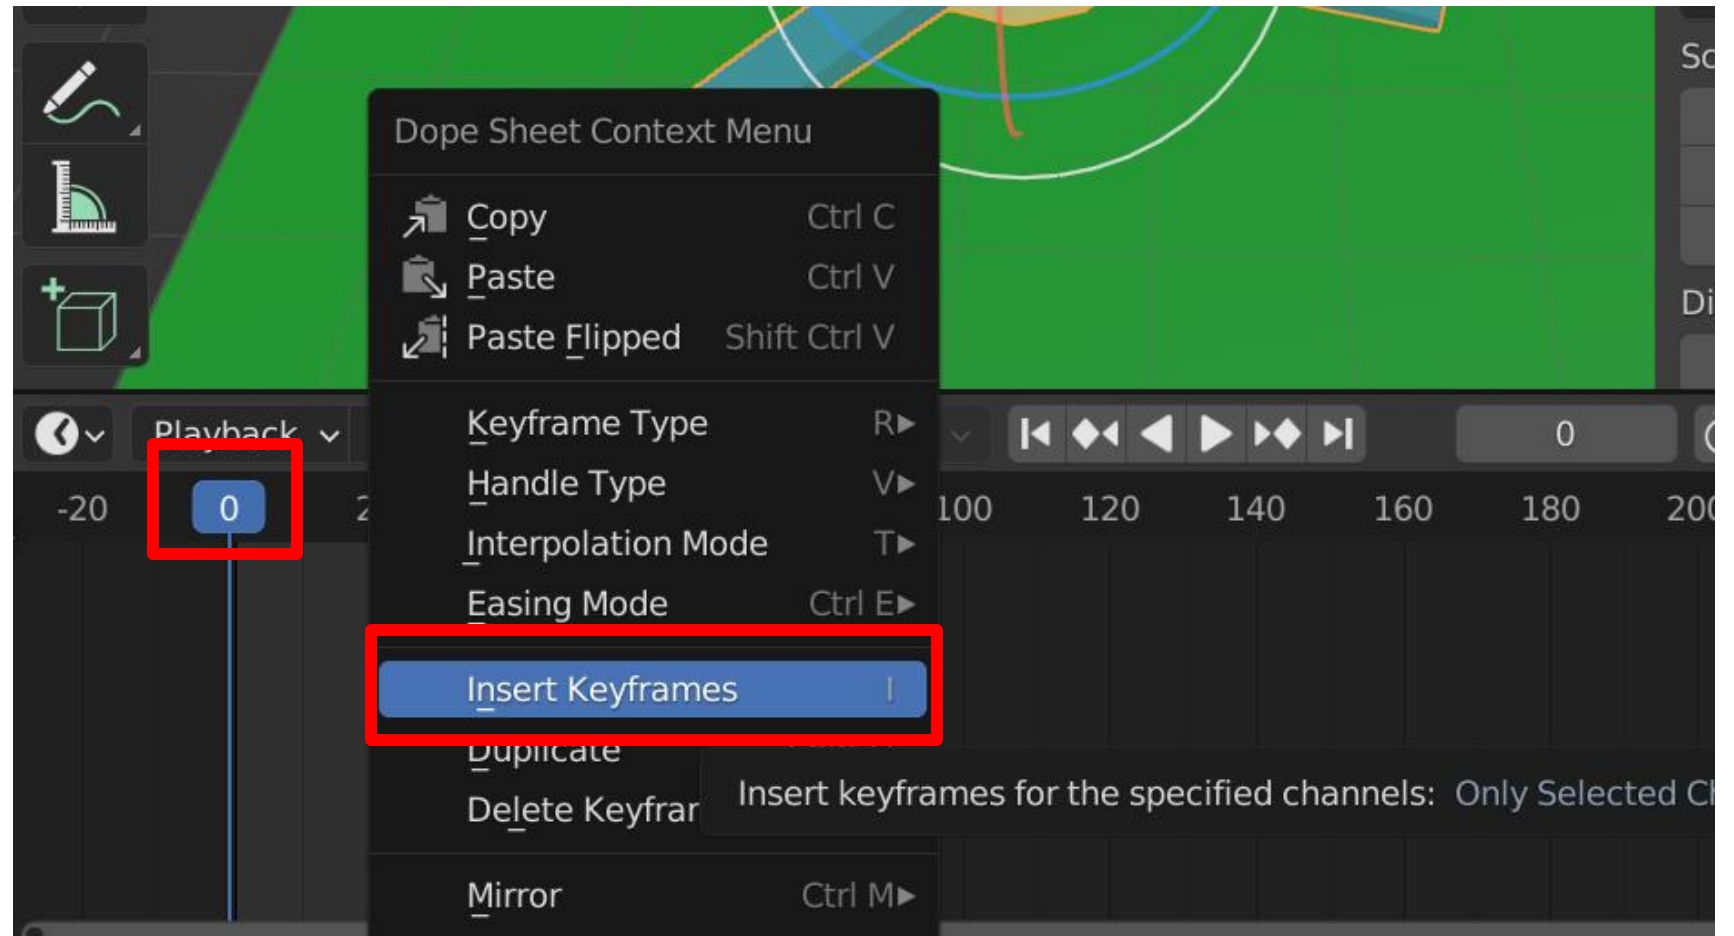

Work with the timeline

Decide the duration – End frame number, e.g., set to **60** frames

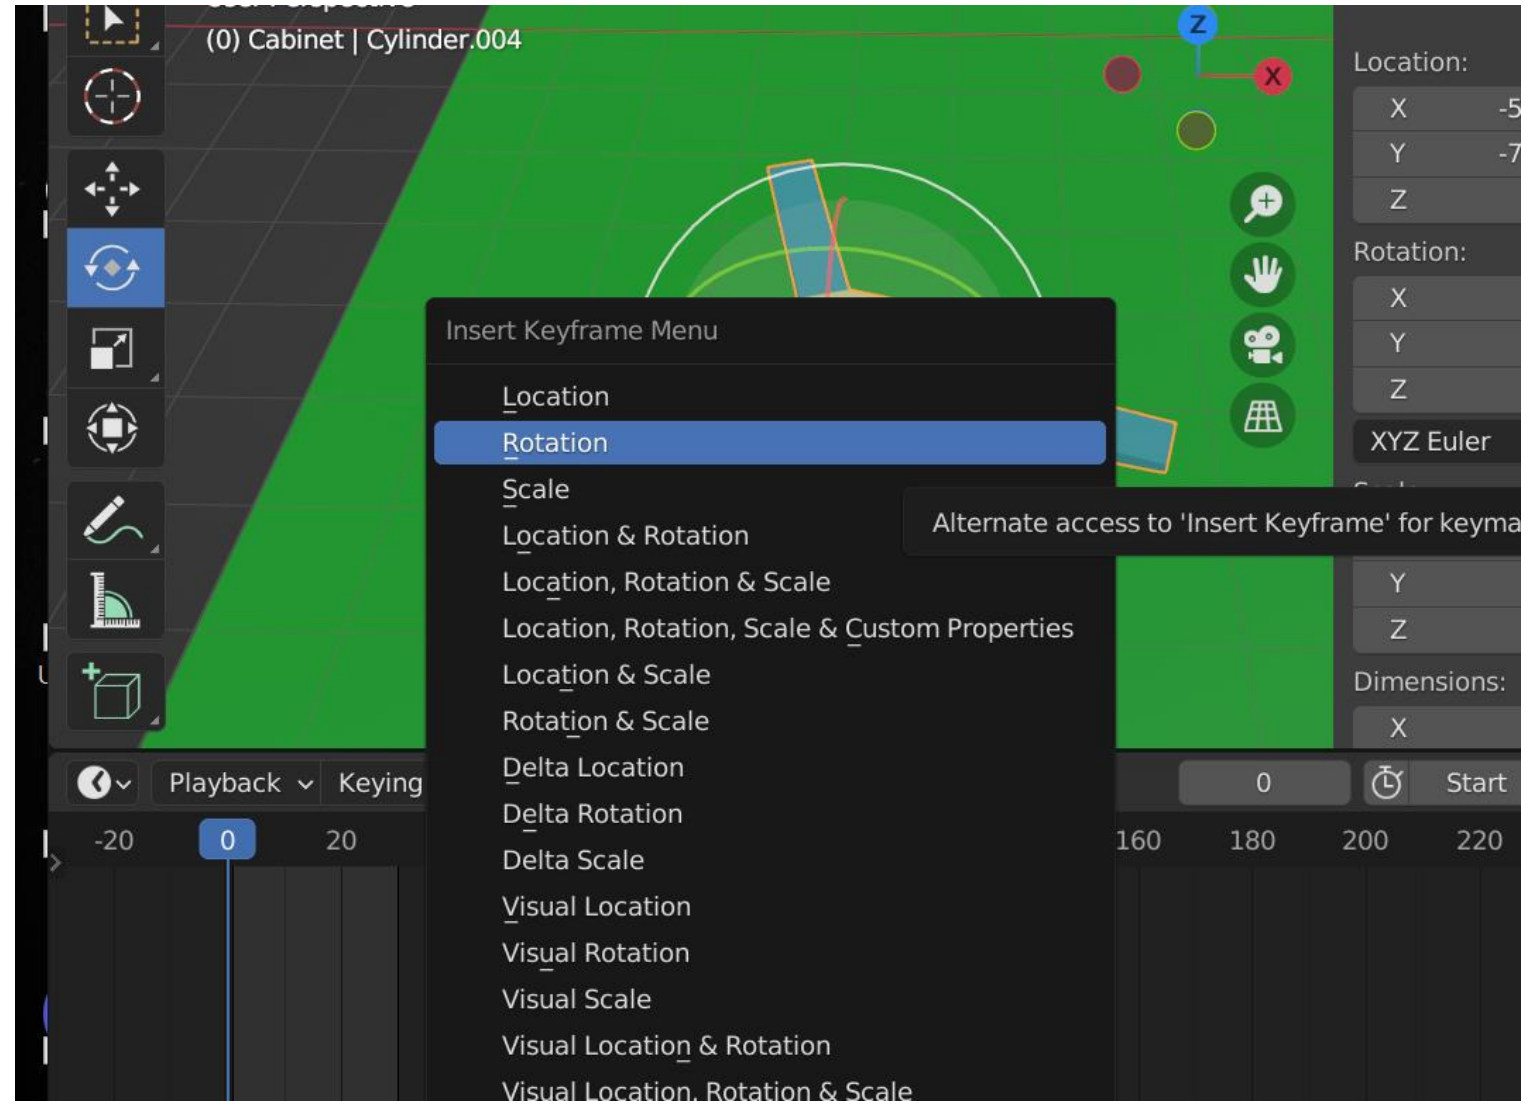

Step 02

Add a key for the Start Rotation i.e., '0' degree at the '0' frame with 'I' key

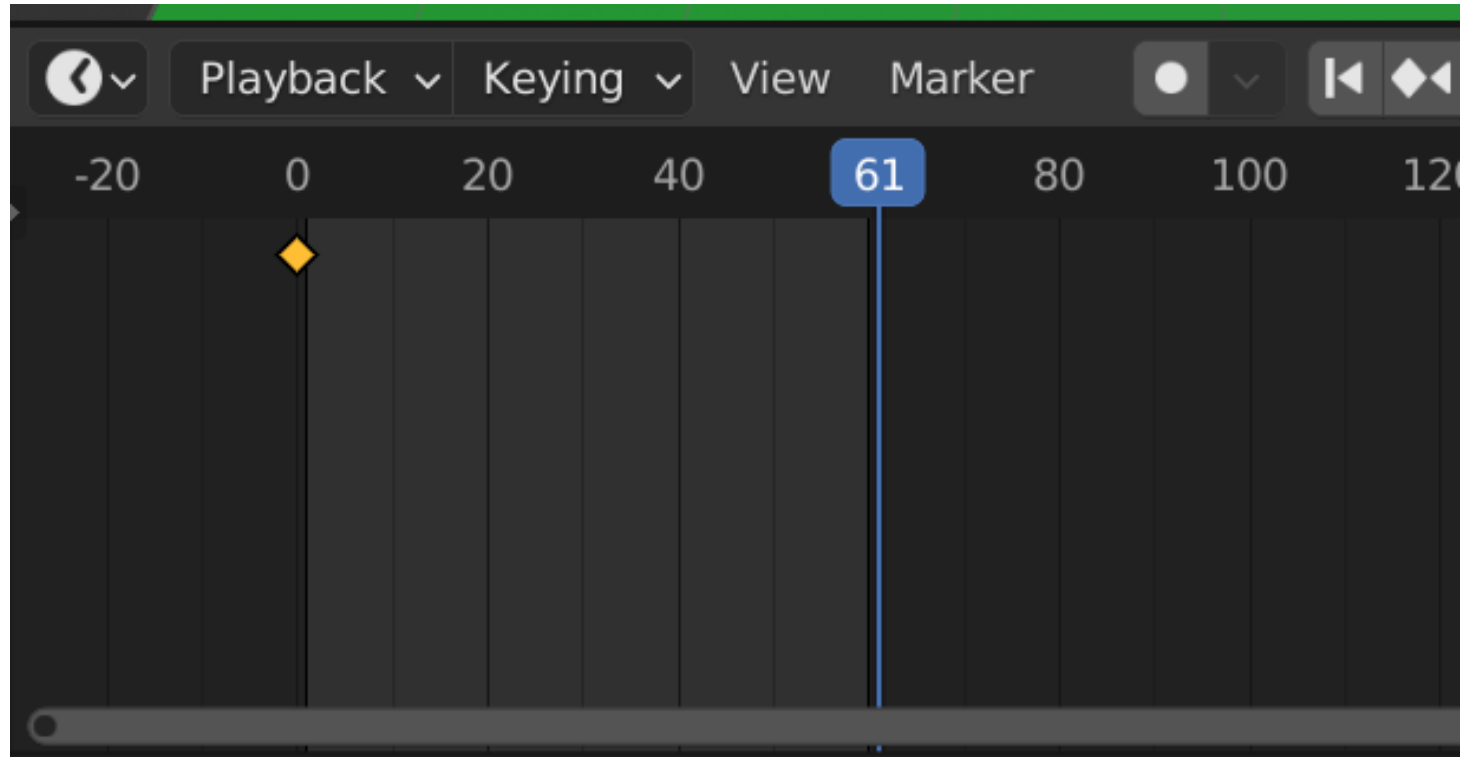

Step 02

Select the object & press 'I' key to insert a key with 'Rotation'

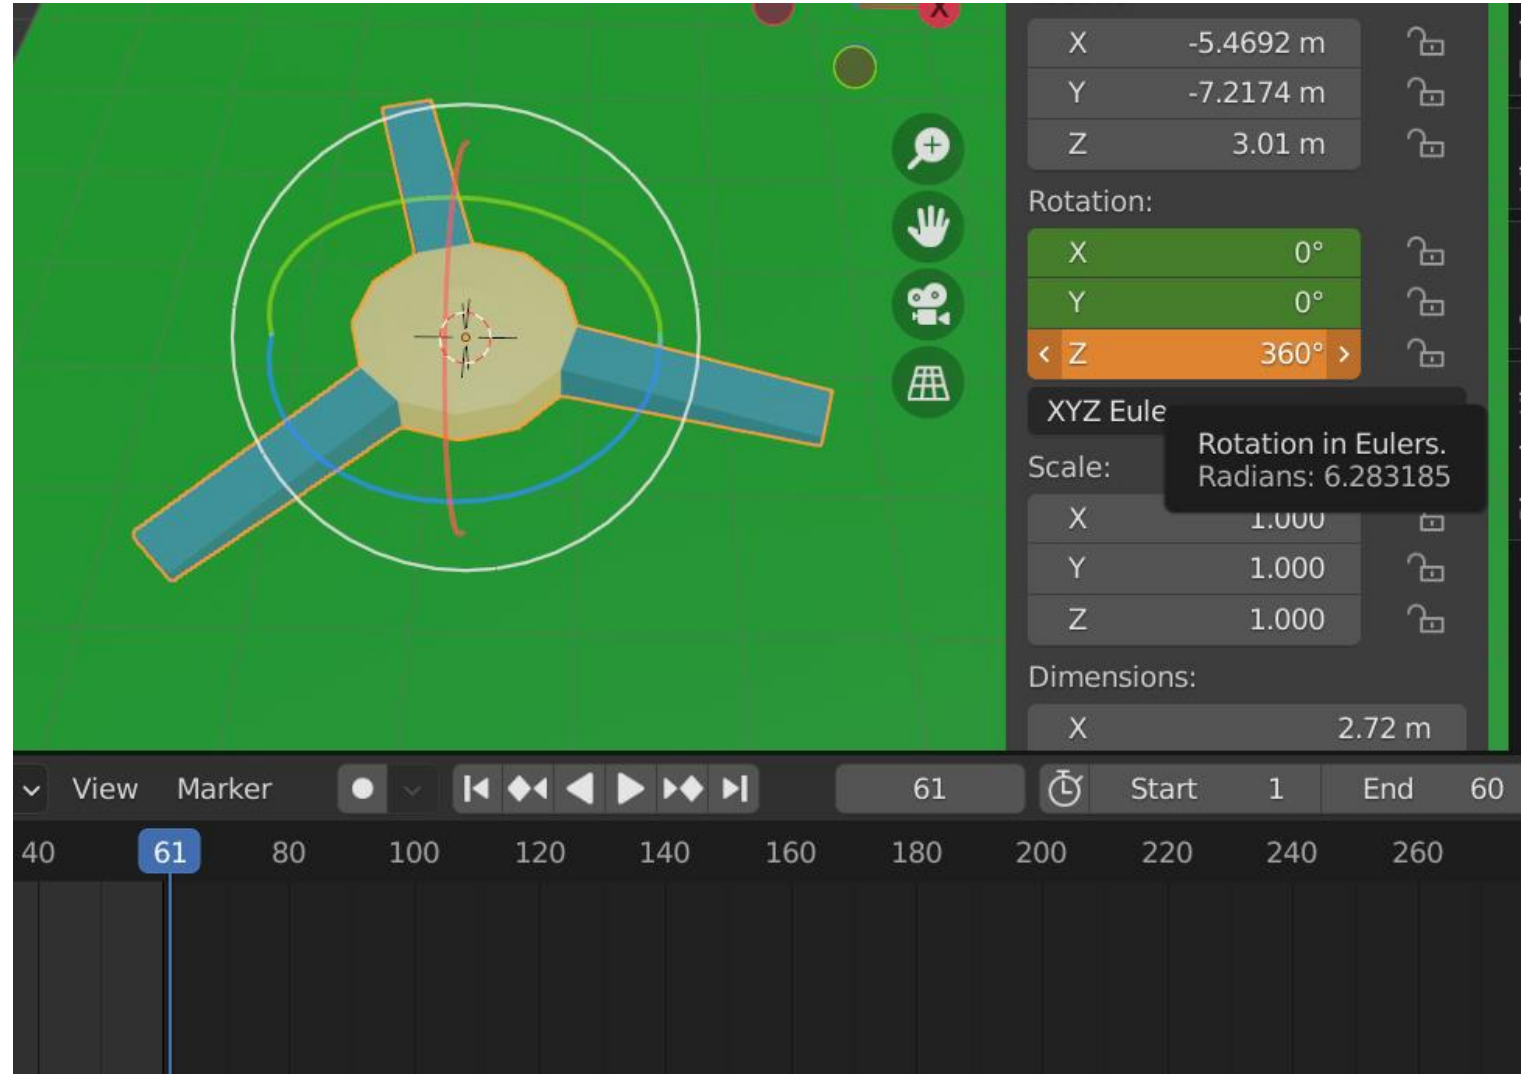

Step 02

Move the
Timeline
Handle to the
end e.g., '61',
to add another
key

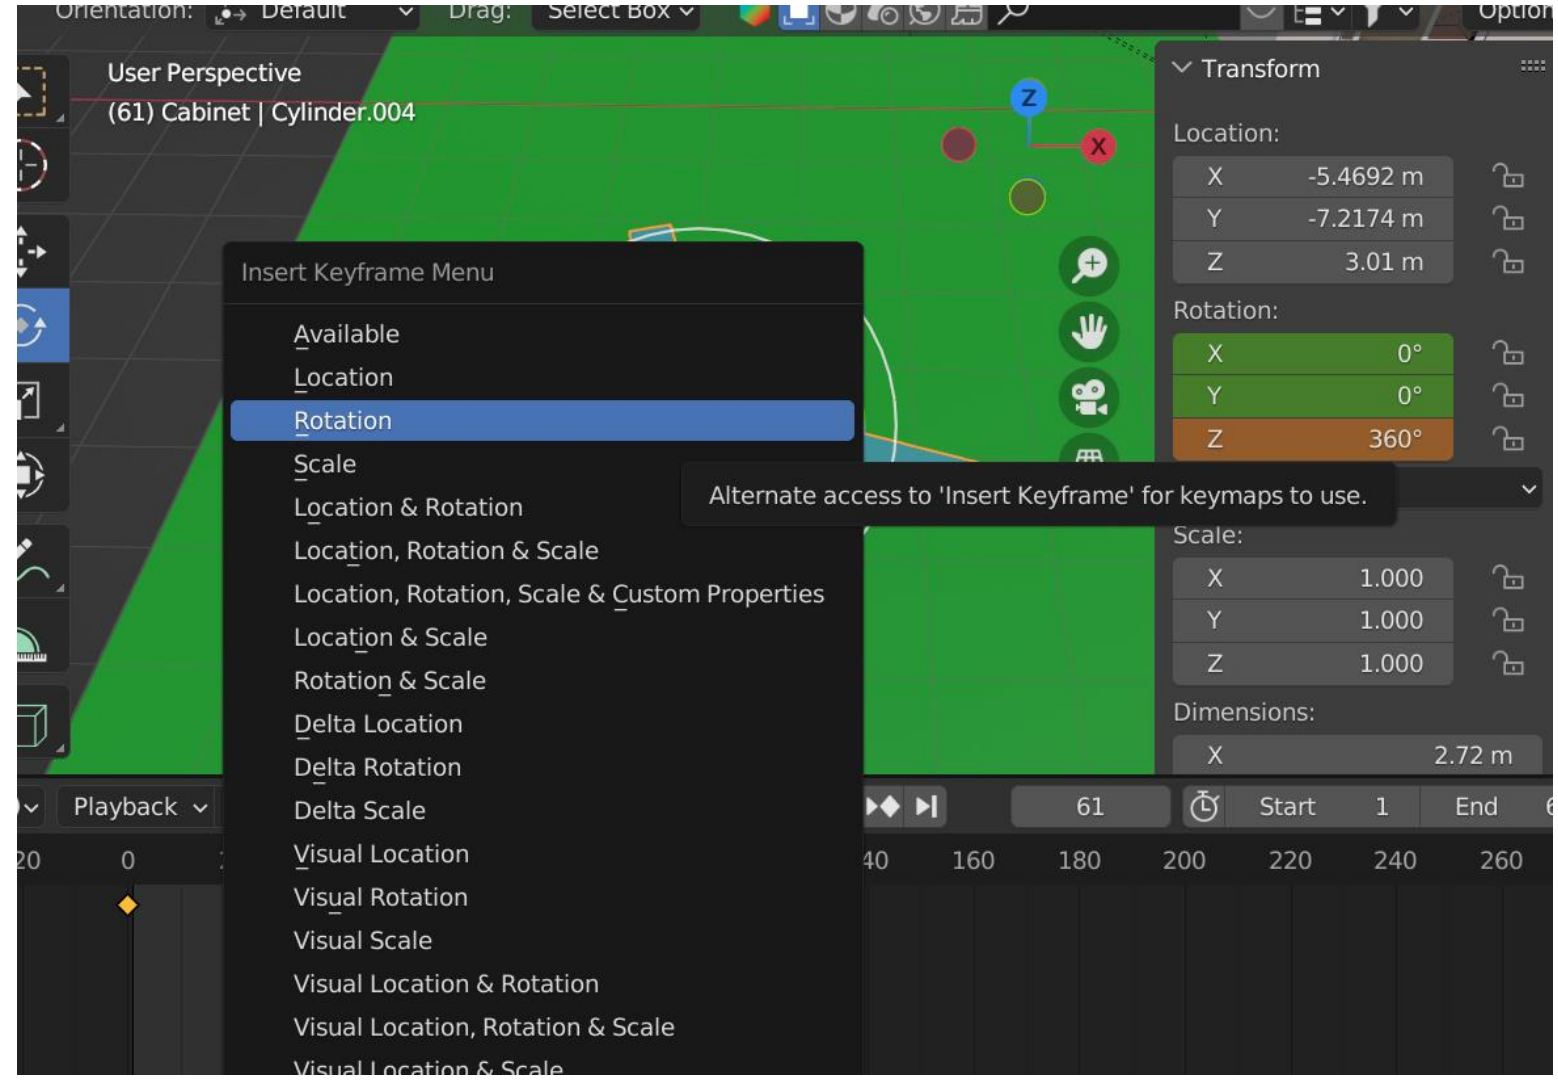

Step 02

Change the
Rotation along
'Z' to '360'
degree

Step 02

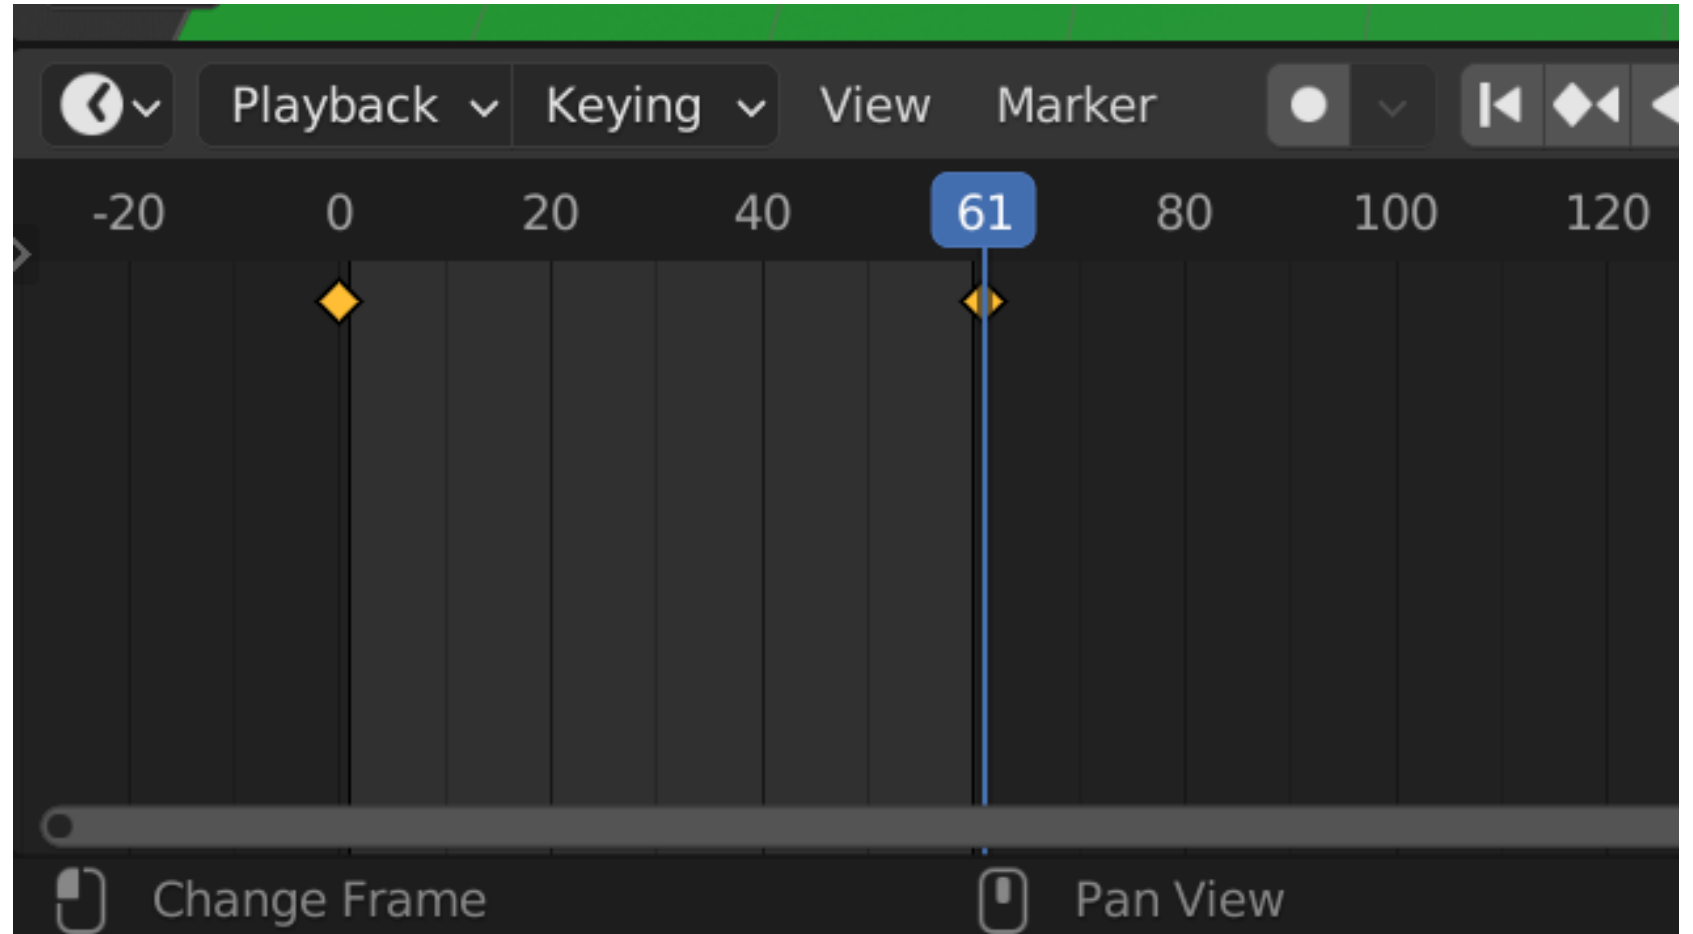

Now add
another key by
press 'I'

Step 02

Now we have
two keys on
the timeline

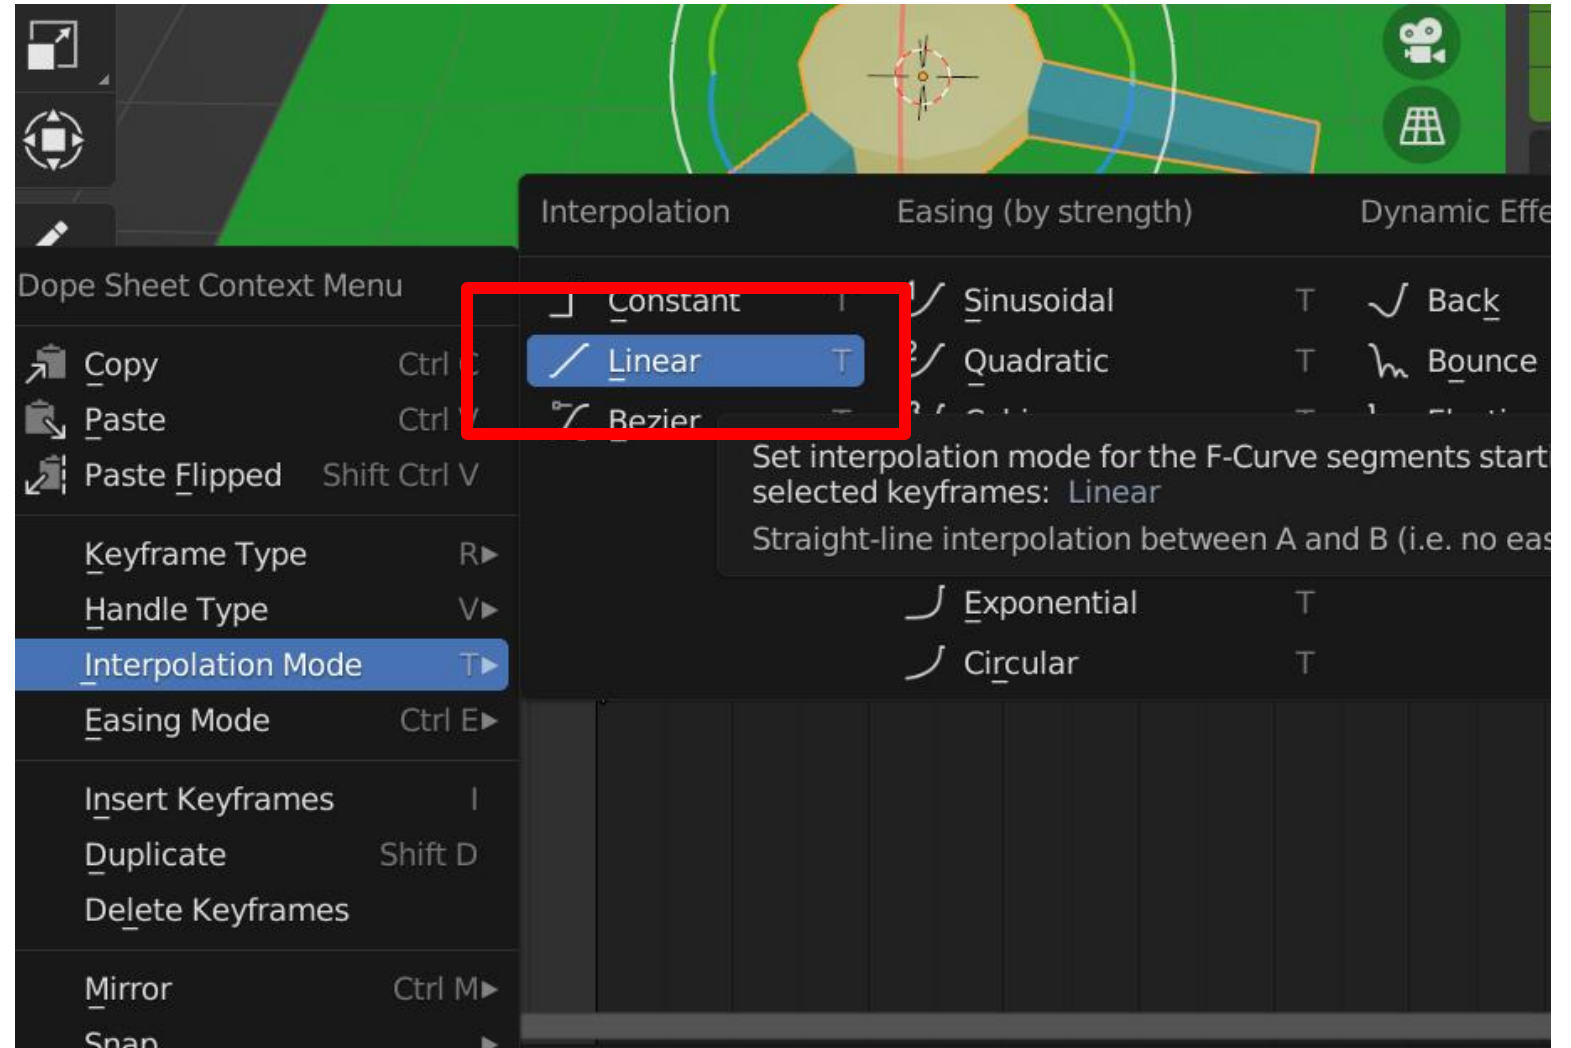

=> next preview
the animation
by 'play'

Step 03

Set the
Interpolation
Mode to
'Linear'

Right click
context menu in
the timeline

Question & Exercise

How to make the fan spin 2 times faster?

Rotational Speed

$$\text{speed} = \frac{\text{distance traveled}}{\text{time it took}}$$

Hint: work with the timeline frame count

Some Exercises

How to create
an extension
rod?

How to
reposition
them in the
rooms?

Hint: try another cylinder

Play time:

- add furniture
- change materials
- add or change lighting
- render new images
- work on your own house
